Thanks, the test scenario wasn't clear to me. But say hypothetically I had a pointer for a ID but for some reason the driver had a DL (in other words, the pointer somehow was incorrectly managed), would you expect a SC for doc type 3 to return blank class codes as well as issue/expire dates? I just want to be clear on how best to deal with these potentially unexpected situations.

Also, thanks for the info on the addition info validation in **CDL1.2.2.3 Data Look-up Errors**. I'm sure this can be found in the specs but can you tell me how I can determine the SOI is a S2S per request SB/SG?

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver H

This email comes from an external source, so remember, Think Before You Click!

Regarding G4, we started off Driver G as a CDL = Y and doc type = 1 but changed it to Non CDL and doc type = 3 in test case G3(hence you received SC with doc type 3).

So, on G4 all the information that AI usually sends for a doc type 3, is expected.

Please let me know if this helps or you need more information.

Thank you for sending H3 again.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver H

H3 has been sent.

Regarding the G4 problem, this relates to a fix I previously made with ranking the driver class. In this case, the SC was sent with a doc type of 3. I would have expected that no license class info would be returned since the driver only has a CDL. Hence, since I populated the issue/expire date of the CDL I had considered that was a problem and they should be blank.

So does it ever matter if the doc type is specified in the inquiry? For SC/SD requests, I am adhering to the requested doc type and for SB/SG I am ranking the class per the specs.

Let me know where I went wrong.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver H

Well, the UD erred because the SSN substitution failed to correctly populate BPES2. So this will require a fix.

I did put a fix in for the DOB/name alias alignment as well as the system release code on H1. Can we go back to G4 and retry the search inquiry?

This email comes from an external source, so remember, Think Before You Click!

Good Morning Gary,

For this driver, we mainly want to make sure that a State is able to change the CDLIS pointer from N to Y during the CSOR.

Also, we do not need the permit as well. So, when AI sends the UD, please send with old Doc type = 1 (We've added the P3 pointer with Doc Type = 1); Old CDLIS as N and New CDLIS as Y. So, Alaska will be creating a CDL for the driver.

Please let me know of any questions.

Thank you,  
Siri.

The fix that aligns the DOB aliases with names was not in the last deployment. Also, the H1 system release code was applied to SB/SD responses but apparently missed on SC/SG responses, which will require a fix.

These two fixes may take about an hour, but I realize you have a short day. Would you prefer to skip to another test?

I also anticipate G7/G8 validations will fail.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver F

In the F4 instructions it depicts both the pointer SSN and duplicate SSN as 111999999:

- Driver Social Security Number (DDVSS6) = 111999999
- Duplicate Driver Social Security Number (DDVSS8) = 111999999

Can I assume the DDVSS6 should still be the substitute SSN?

I got an returned error SSN AND SSN TYPE MUST BE CONSISTENT.

Maybe I misunderstood the test instruction. It depicted SSN 111999999, however, I gather I should not have changed the SSN and instead only changed the name fields. Is that correct?

Hi Siri,

We skipped Driver F yesterday. I currently have the driver info set up and can begin with F1 and F2.

We ended yesterday with G3. I will need to update the driver and likely start with a new pointer. Let me know if you would rather pick up on Driver G.

thanks

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver G

The UC returned error: SSN NOT ALLOWED FOR NON-CDLIS POINTER

Just to clarify, since the old pointer was CDLIS, it should have the full SSN (DDVSS1) as well as the last 5 digits (BPES2). But since the new pointer is non-CDLIS, only the last 5 digits (BPESD) should be populated with a blank SSN (DDVSS6), correct?

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver F

Sure, let me make sure I understand the Driver G setup. Since he will have CDLIS pointer, I will create a commercial license. For the pseudo SSN, do I assign 000376666 to the driver? Or do I instead create a normal SSN and this one is just used for inquiry, etc? We have validations that prevent entry of this type of SSN so just want to have a better understanding of the business scenario.

Gary,

In Test Case # G3, AI sends UC message and the CDLIS Pinter Indicator is changed from 'Y' to 'N'.

Driver G ( DLN '7685500' ) , still shows the CDLIS Pointer Indicator as 'Y' .

Can you please look.

Thanks,  
Asma

Regarding your first question, I'll need to get back to you ( Since you will be leaving soon today, I'll have it to you by Monday)

For the second question: on the SG/SB message you receive, there is a SPEXS Functional role code(DCDFRC), you can use the value in this field to determine if the State is a S2S State(if this value is 2, it's a S2S State).

Thank you

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver H

Thanks, the test scenario wasn't clear to me. But say hypothetically I had a pointer for a ID but for some reason the driver had a DL (in other words, the pointer somehow was incorrectly managed), would you expect a SC for doc type 3 to return blank class codes as well as issue/expire dates? I just want to be clear on how best to deal with these potentially unexpected situations.

Also, thanks for the info on the addition info validation in **CDL1.2.2.3 Data Look-up Errors**. I'm sure this can be found in the specs but can you tell me how I can determine the SOI is a S2S per request SB/SG?

This email comes from an external source, so remember, Think Before You Click!

Regarding G4, we started off Driver G as a CDL = Y and doc type = 1 but changed it to Non CDL and doc type = 3 in test case G3(hence you received SC with doc type 3).

So, on G4 all the information that AI usually sends for a doc type 3, is expected.

Please let me know if this helps or you need more information.

Thank you for sending H3 again.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver H

H3 has been sent.

Regarding the G4 problem, this relates to a fix I previously made with ranking the driver class. In this case, the SC was sent with a doc type of 3. I would have expected that no license class info would be returned since the driver only has a CDL. Hence, since I populated the issue/expire date of the CDL I had considered that was a problem and they should be blank.

So does it ever matter if the doc type is specified in the inquiry? For SC/SD requests, I am adhering to the requested doc type and for SB/SG I am ranking the class per the specs.

Let me know where I went wrong.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver H

This email comes from an external source, so remember, Think Before You Click!

Good Morning Gary,

For this driver, we mainly want to make sure that a State is able to change the CDLIS pointer from N to Y during the CSOR.

Also, we do not need the permit as well. So, when AI sends the UD, please send with old Doc type = 1 (We've added the P3 pointer with Doc Type = 1); Old CDLIS as N and New CDLIS as Y. So, Alaska will be creating a CDL for the driver.

Please let me know of any questions.

Thank you,  
Siri.

[The fix that aligns the DOB aliases with names was not in the last deployment. Also, the H1 system release code was applied to SB/SD responses but apparently missed on SC/SG responses, which will require a fix.](#)

These two fixes may take about an hour, but I realize you have a short day. Would you prefer to skip to another test?

I also anticipate G7/G8 validations will fail.

Gary,

I just sent G4 and wanted to ask about the AKA DOB. I see 3 AKA Names but only 2 AKA DOB.

And also the GMSSRL , System Release code was empty on the H1 message. I think you had fixed that in a previous driver stream?

Could you please take a look?

Thank you

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver F

Sure, let me make sure I understand the Driver G setup. Since he will have CDLIS pointer, I will create a commercial license. For the pseudo SSN, do I assign 000376666 to the driver? Or do I instead create a normal SSN and this one is just used for inquiry, etc? We have validations that prevent entry of this type of SSN so just want to have a better understanding of the business scenario.

Regarding your first question, I'll need to get back to you ( Since you will be leaving soon today, I'll have it to you by Monday)

For the second question: on the SG/SB message you receive, there is a SPEXS Functional role code(DCDFRC), you can use the value in this field to determine if the State is a S2S State(if this value is 2, it's a S2S State).

Thank you

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver H

Thanks, the test scenario wasn't clear to me. But say hypothetically I had a pointer for a ID but for some reason the driver had a DL (in other words, the pointer somehow was incorrectly managed), would you expect a SC for doc type 3 to return blank class codes as well as issue/expire dates? I just want to be clear on how best to deal with these potentially unexpected situations.

Also, thanks for the info on the addition info validation in **CDL1.2.2.3 Data Look-up Errors**. I'm sure this can be found in the specs but can you tell me how I can determine the SOI is a S2S per request SB/SG?

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver H

This email comes from an external source, so remember, Think Before You Click!

Regarding G4, we started off Driver G as a CDL = Y and doc type = 1 but changed it to Non CDL and doc type = 3 in test case G3(hence you received SC with doc type 3).

So, on G4 all the information that AI usually sends for a doc type 3, is expected.

Please let me know if this helps or you need more information.

Thank you for sending H3 again.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver H

H3 has been sent.

Regarding the G4 problem, this relates to a fix I previously made with ranking the driver class. In this case, the SC was sent with a doc type of 3. I would have expected that no license class info would be returned since the driver only has a CDL. Hence, since I populated the issue/expire date of the CDL I had considered that was a problem and they should be blank.

So does it ever matter if the doc type is specified in the inquiry? For SC/SD requests, I am adhering to the requested doc type and for SB/SG I am ranking the class per the specs.

Let me know where I went wrong.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver H

Well, the UD erred because the SSN substitution failed to correctly populate BPES2. So this will require a fix.

I did put a fix in for the DOB/name alias alignment as well as the system release code on H1. Can we go back to G4 and retry the search inquiry?

This email comes from an external source, so remember, Think Before You Click!

Good Morning Gary,

For this driver, we mainly want to make sure that a State is able to change the CDLIS pointer from N to Y during the CSOR.

Also, we do not need the permit as well. So, when AI sends the UD, please send with old Doc type = 1 (We've added the P3 pointer with Doc Type = 1); Old CDLIS as N and New CDLIS as Y. So, Alaska will be creating a CDL for the driver.

Please let me know of any questions.

Thank you,  
Siri.

Yes, this is a good break point.

Also, the doc type is documented as 2 for the P3 driver, although it was 1 in the RD.

Talk to you tomorrow.

The fix that aligns the DOB aliases with names was not in the last deployment. Also, the H1 system release code was applied to SB/SD responses but apparently missed on SC/SG responses, which will require a fix.

These two fixes may take about an hour, but I realize you have a short day. Would you prefer to skip to another test?

I also anticipate G7/G8 validations will fail.

Gary,

Sure. If you are ready today, just let me know and we can continue.

Thursday and Friday, I am out of office.

Thursday, Siri can help you till 1:30 PM (EST) and Friday you can continue with her till 3:30 PM (EST).

Let me know if you have any questions.

Thanks,  
Asma

Ok, thanks.

I likely will be unable to test for the next hour or two while we deal with unrelated pressing issues.

If I am able to get a quick fix in for any of the new bugs today we may be able to continue testing; otherwise we likely will need to start again tomorrow. I'll let you know the situation in the next hour or so.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver G

The UC returned error: SSN NOT ALLOWED FOR NON-CDLIS POINTER

Just to clarify, since the old pointer was CDLIS, it should have the full SSN (DDVSS1) as well as the last 5 digits (BPES2). But since the new pointer is non-CDLIS, only the last 5 digits (BPES5) should be populated with a blank SSN (DDVSS6), correct?

**Cc:** Mina Peters, AK Dept. of Administration <[mina.peters@alaska.gov](mailto:mina.peters@alaska.gov)>; Singaraju, Sruti <[ssingaraju@aamva.org](mailto:ssingaraju@aamva.org)>  
**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver F

Sure, let me make sure I understand the Driver G setup. Since he will have CDLIS pointer, I will create a commercial license. For the pseudo SSN, do I assign 000376666 to the driver? Or do I instead create a normal SSN and this one is just used for inquiry, etc? We have validations that prevent entry of this type of SSN so just want to have a better understanding of the business scenario.

This email comes from an external source, so remember, Think Before You Click!

Regarding your first question, I'll need to get back to you ( Since you will be leaving soon today, I'll have it to you by Monday)

For the second question: on the SG/SB message you receive, there is a SPEXS Functional role code(DCDFRC), you can use the value in this field to determine if the State is a S2S State(if this value is 2, it's a S2S State).

Thank you

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver H

Thanks, the test scenario wasn't clear to me. But say hypothetically I had a pointer for a ID but for some reason the driver had a DL (in other words, the pointer somehow was incorrectly managed), would you expect a SC for doc type 3 to return blank class codes as well as issue/expire dates? I just want to be clear on how best to deal with these potentially unexpected situations.

Also, thanks for the info on the addition info validation in **CDL1.2.2.3 Data Look-up Errors**. I'm sure this can be found in the specs but can you tell me how I can determine the SOI is a S2S per request SB/SG?

This email comes from an external source, so remember, Think Before You Click!

Regarding G4, we started off Driver G as a CDL = Y and doc type = 1 but changed it to Non CDL and doc type = 3 in test case G3(hence you received SC with doc type 3).

So, on G4 all the information that AI usually sends for a doc type 3, is expected.

Please let me know if this helps or you need more information.

Thank you for sending H3 again.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver H

H3 has been sent.

Regarding the G4 problem, this relates to a fix I previously made with ranking the driver class. In this case, the SC was sent with a doc type of 3. I would have expected that no license class info would be returned since the driver only has a

CDL. Hence, since I populated the issue/expire date of the CDL I had considered that was a problem and they should be blank.

So does it ever matter if the doc type is specified in the inquiry? For SC/SD requests, I am adhering to the requested doc type and for SB/SG I am ranking the class per the specs.

Let me know where I went wrong.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver H

This email comes from an external source, so remember, Think Before You Click!

Good Morning Gary,

For this driver, we mainly want to make sure that a State is able to change the CDLIS pointer from N to Y during the CSOR.

Also, we do not need the permit as well. So, when AI sends the UD, please send with old Doc type = 1 (We've added the P3 pointer with Doc Type = 1); Old CDLIS as N and New CDLIS as Y. So, Alaska will be creating a CDL for the driver.

Please let me know of any questions.

Thank you,  
Siri.

The fix that aligns the DOB aliases with names was not in the last deployment. Also, the H1 system release code was applied to SB/SD responses but apparently missed on SC/SG responses, which will require a fix.

These two fixes may take about an hour, but I realize you have a short day. Would you prefer to skip to another test?

I also anticipate G7/G8 validations will fail.

Gary,

To avoid any confusion, I think you can use the values same as that were present on the NA that AI received.

Thank you,  
Siri.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver F

In the F4 instructions it depicts both the pointer SSN and duplicate SSN as 111999999:

- Driver Social Security Number (DDVSS6) = 111999999
- Duplicate Driver Social Security Number (DDVSS8) = 111999999

Can I assume the DDVSS6 should still be the substitute SSN?

Hi Siri,

We skipped Driver F yesterday. I currently have the driver info set up and can begin with F1 and F2.

We ended yesterday with G3. I will need to update the driver and likely start with a new pointer. Let me know if you would rather pick up on Driver G.

thanks

The UC returned error: SSN NOT ALLOWED FOR NON-CDLIS POINTER

Just to clarify, since the old pointer was CDLIS, it should have the full SSN (DDVSS1) as well as the last 5 digits (BPSS2). But since the new pointer is non-CDLIS, only the last 5 digits (BPSSD) should be populated with a blank SSN (DDVSS6), correct?

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver F

Sure, let me make sure I understand the Driver G setup. Since he will have CDLIS pointer, I will create a commercial license. For the pseudo SSN, do I assign 000376666 to the driver? Or do I instead create a normal SSN and this one is just used for inquiry, etc? We have validations that prevent entry of this type of SSN so just want to have a better understanding of the business scenario.

Gary,

In Test Case # G3, AI sends UC message and the CDLIS Pinter Indicator is changed from 'Y' to 'N'.

Driver G ( DLN '7685500' ) , still shows the CDLIS Pointer Indicator as 'Y' .

Can you please look.

Thanks,  
Asma

Regarding your first question, I'll need to get back to you ( Since you will be leaving soon today, I'll have it to you by Monday)

For the second question: on the SG/SB message you receive, there is a SPEXS Functional role code(DCDFRC), you can use the value in this field to determine if the State is a S2S State(if this value is 2, it's a S2S State).

Thank you

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver H

Thanks, the test scenario wasn't clear to me. But say hypothetically I had a pointer for a ID but for some reason the driver had a DL (in other words, the pointer somehow was incorrectly managed), would you expect a SC for doc type 3 to return blank class codes as well as issue/expire dates? I just want to be clear on how best to deal with these potentially unexpected situations.

Also, thanks for the info on the addition info validation in **CDL1.2.2.3 Data Look-up Errors**. I'm sure this can be found in the specs but can you tell me how I can determine the SOI is a S2S per request SB/SG?

This email comes from an external source, so remember, Think Before You Click!

Regarding G4, we started off Driver G as a CDL = Y and doc type = 1 but changed it to Non CDL and doc type = 3 in test case G3(hence you received SC with doc type 3).

So, on G4 all the information that AI usually sends for a doc type 3, is expected.

Please let me know if this helps or you need more information.

Thank you for sending H3 again.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver H

H3 has been sent.

Regarding the G4 problem, this relates to a fix I previously made with ranking the driver class. In this case, the SC was sent with a doc type of 3. I would have expected that no license class info would be returned since the driver only has a

CDL. Hence, since I populated the issue/expire date of the CDL I had considered that was a problem and they should be blank.

So does it ever matter if the doc type is specified in the inquiry? For SC/SD requests, I am adhering to the requested doc type and for SB/SG I am ranking the class per the specs.

Let me know where I went wrong.

This email comes from an external source, so remember, Think Before You Click!

Good Morning Gary,

For this driver, we mainly want to make sure that a State is able to change the CDLIS pointer from N to Y during the CSOR.

Also, we do not need the permit as well. So, when AI sends the UD, please send with old Doc type = 1 (We've added the P3 pointer with Doc Type = 1); Old CDLIS as N and New CDLIS as Y. So, Alaska will be creating a CDL for the driver.

Please let me know of any questions.

Thank you,  
Siri.

The fix that aligns the DOB aliases with names was not in the last deployment. Also, the H1 system release code was applied to SB/SD responses but apparently missed on SC/SG responses, which will require a fix.

These two fixes may take about an hour, but I realize you have a short day. Would you prefer to skip to another test?

I also anticipate G7/G8 validations will fail.

Gary,

I just sent G4 and wanted to ask about the AKA DOB. I see 3 AKA Names but only 2 AKA DOB.

And also the GMSSRL , System Release code was empty on the H1 message. I think you had fixed that in a previous driver stream?

Could you please take a look?

Thank you

This email comes from an external source, so remember, Think Before You Click!

Gary,

If AI cannot add a pointer with a Pseudo SSN, you can add Driver G with Assigned SSN.

Let me know if you have any question.

Thanks,  
Asma

**Cc:** Mina Peters, AK Dept. of Administration <[mina.peters@alaska.gov](mailto:mina.peters@alaska.gov)>; Singaraju, Sruti <[ssingaraju@aamva.org](mailto:ssingaraju@aamva.org)>  
**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver F

Sure, let me make sure I understand the Driver G setup. Since he will have CDLIS pointer, I will create a commercial license. For the pseudo SSN, do I assign 000376666 to the driver? Or do I instead create a normal SSN and this one is just used for inquiry, etc? We have validations that prevent entry of this type of SSN so just want to have a better understanding of the business scenario.

Regarding your first question, I'll need to get back to you ( Since you will be leaving soon today, I'll have it to you by Monday)

For the second question: on the SG/SB message you receive, there is a SPEXS Functional role code(DCDFRC), you can use the value in this field to determine if the State is a S2S State(if this value is 2, it's a S2S State).

Thank you

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver H

Thanks, the test scenario wasn't clear to me. But say hypothetically I had a pointer for a ID but for some reason the driver had a DL (in other words, the pointer somehow was incorrectly managed), would you expect a SC for doc type 3 to return blank class codes as well as issue/expire dates? I just want to be clear on how best to deal with these potentially unexpected situations.

Also, thanks for the info on the addition info validation in **CDL1.2.2.3 Data Look-up Errors**. I'm sure this can be found in the specs but can you tell me how I can determine the SOI is a S2S per request SB/SG?

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver H

This email comes from an external source, so remember, Think Before You Click!

Regarding G4, we started off Driver G as a CDL = Y and doc type = 1 but changed it to Non CDL and doc type = 3 in test case G3(hence you received SC with doc type 3).

So, on G4 all the information that AI usually sends for a doc type 3, is expected.

Please let me know if this helps or you need more information.

Thank you for sending H3 again.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver H

H3 has been sent.

Regarding the G4 problem, this relates to a fix I previously made with ranking the driver class. In this case, the SC was sent with a doc type of 3. I would have expected that no license class info would be returned since the driver only has a CDL. Hence, since I populated the issue/expire date of the CDL I had considered that was a problem and they should be blank.

So does it ever matter if the doc type is specified in the inquiry? For SC/SD requests, I am adhering to the requested doc type and for SB/SG I am ranking the class per the specs.

Let me know where I went wrong.

Ok, I sent G4, the system release code is populated correctly now but I still see only 2 AKA DOBs on the HC message:

DDVDOB	DRIVER DATE OF BIRTH	1	19661211
DDVKDO	DRIVER AKA DATE OF BIRTH	1	19661117
DDVKDO	DRIVER AKA DATE OF BIRTH	2	19661116
DDVKDO	DRIVER AKA DATE OF BIRTH	3	

Thank you,  
Siri.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver H

Well, the UD erred because the SSN substitution failed to correctly populate BPES2. So this will require a fix.

I did put a fix in for the DOB/name alias alignment as well as the system release code on H1. Can we go back to G4 and retry the search inquiry?

This email comes from an external source, so remember, Think Before You Click!

Good Morning Gary,

For this driver, we mainly want to make sure that a State is able to change the CDLIS pointer from N to Y during the CSOR.

Also, we do not need the permit as well. So, when AI sends the UD, please send with old Doc type = 1 (We've added the P3 pointer with Doc Type = 1); Old CDLIS as N and New CDLIS as Y. So, Alaska will be creating a CDL for the driver.

Please let me know of any questions.

Thank you,  
Siri.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver F

The fix that aligns the DOB aliases with names was not in the last deployment. Also, the H1 system release code was applied to SB/SD responses but apparently missed on SC/SG responses, which will require a fix.

These two fixes may take about an hour, but I realize you have a short day. Would you prefer to skip to another test?

I also anticipate G7/G8 validations will fail.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver F

I got an returned error SSN AND SSN TYPE MUST BE CONSISTENT.

Maybe I misunderstood the test instruction. It depicted SSN 111999999, however, I gather I should not have changed the SSN and instead only changed the name fields. Is that correct?

Hi Siri,

We skipped Driver F yesterday. I currently have the driver info set up and can begin with F1 and F2.

We ended yesterday with G3. I will need to update the driver and likely start with a new pointer. Let me know if you would rather pick up on Driver G.

thanks

Gary,

Sure. If you are ready today, just let me know and we can continue.

Thursday and Friday, I am out of office.

Thursday, Siri can help you till 1:30 PM (EST) and Friday you can continue with her till 3:30 PM (EST).

Let me know if you have any questions.

Thanks,  
Asma

Ok, thanks.

I likely will be unable to test for the next hour or two while we deal with unrelated pressing issues.

If I am able to get a quick fix in for any of the new bugs today we may be able to continue testing; otherwise we likely will need to start again tomorrow. I'll let you know the situation in the next hour or so.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver G

The UC returned error: SSN NOT ALLOWED FOR NON-CDLIS POINTER

Just to clarify, since the old pointer was CDLIS, it should have the full SSN (DDVSS1) as well as the last 5 digits (BPES2). But since the new pointer is non-CDLIS, only the last 5 digits (BPESD) should be populated with a blank SSN (DDVSS6), correct?

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver F

Sure, let me make sure I understand the Driver G setup. Since he will have CDLIS pointer, I will create a commercial license. For the pseudo SSN, do I assign 000376666 to the driver? Or do I instead create a normal SSN and this one is just used for inquiry, etc? We have validations that prevent entry of this type of SSN so just want to have a better understanding of the business scenario.

Gary,

In Test Case # G3, AI sends UC message and the CDLIS Pinter Indicator is changed from 'Y' to 'N'.

Driver G ( DLN '7685500' ) , still shows the CDLIS Pointer Indicator as 'Y' .

Can you please look.

Thanks,

Asma

Regarding your first question, I'll need to get back to you ( Since you will be leaving soon today, I'll have it to you by Monday)

For the second question: on the SG/SB message you receive, there is a SPEXS Functional role code(DCDFRC), you can use the value in this field to determine if the State is a S2S State(if this value is 2, it's a S2S State).

Thank you

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver H

Thanks, the test scenario wasn't clear to me. But say hypothetically I had a pointer for a ID but for some reason the driver had a DL (in other words, the pointer somehow was incorrectly managed), would you expect a SC for doc type 3 to return blank class codes as well as issue/expire dates? I just want to be clear on how best to deal with these potentially unexpected situations.

Also, thanks for the info on the addition info validation in **CDL1.2.2.3 Data Look-up Errors**. I'm sure this can be found in the specs but can you tell me how I can determine the SOI is a S2S per request SB/SG?

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver H

This email comes from an external source, so remember, Think Before You Click!

Regarding G4, we started off Driver G as a CDL = Y and doc type = 1 but changed it to Non CDL and doc type = 3 in test case G3(hence you received SC with doc type 3).

So, on G4 all the information that AI usually sends for a doc type 3, is expected.

Please let me know if this helps or you need more information.

Thank you for sending H3 again.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver H

H3 has been sent.

Regarding the G4 problem, this relates to a fix I previously made with ranking the driver class. In this case, the SC was sent with a doc type of 3. I would have expected that no license class info would be returned since the driver only has a CDL. Hence, since I populated the issue/expire date of the CDL I had considered that was a problem and they should be blank.

So does it ever matter if the doc type is specified in the inquiry? For SC/SD requests, I am adhering to the requested doc type and for SB/SG I am ranking the class per the specs.

Let me know where I went wrong.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver H

This email comes from an external source, so remember, Think Before You Click!

Good Morning Gary,

For this driver, we mainly want to make sure that a State is able to change the CDLIS pointer from N to Y during the CSOR.

Also, we do not need the permit as well. So, when AI sends the UD, please send with old Doc type = 1 (We've added the P3 pointer with Doc Type = 1); Old CDLIS as N and New CDLIS as Y. So, Alaska will be creating a CDL for the driver.

Please let me know of any questions.

Thank you,

Siri.

The fix that aligns the DOB aliases with names was not in the last deployment. Also, the H1 system release code was applied to SB/SD responses but apparently missed on SC/SG responses, which will require a fix.

These two fixes may take about an hour, but I realize you have a short day. Would you prefer to skip to another test?

I also anticipate G7/G8 validations will fail.

This email comes from an external source, so remember, Think Before You Click!

Gary,

I just sent G4 and wanted to ask about the AKA DOB. I see 3 AKA Names but only 2 AKA DOB.

And also the GMSSRL , System Release code was empty on the H1 message. I think you had fixed that in a previous driver stream?

Could you please take a look?

Thank you

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver F

Sure, let me make sure I understand the Driver G setup. Since he will have CDLIS pointer, I will create a commercial license. For the pseudo SSN, do I assign 000376666 to the driver? Or do I instead create a normal SSN and this one is just used for inquiry, etc? We have validations that prevent entry of this type of SSN so just want to have a better understanding of the business scenario.

Regarding your first question, I'll need to get back to you ( Since you will be leaving soon today, I'll have it to you by Monday)

For the second question: on the SG/SB message you receive, there is a SPEXS Functional role code(DCDFRC), you can use the value in this field to determine if the State is a S2S State(if this value is 2, it's a S2S State).

Thank you

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver H

Thanks, the test scenario wasn't clear to me. But say hypothetically I had a pointer for a ID but for some reason the driver had a DL (in other words, the pointer somehow was incorrectly managed), would you expect a SC for doc type 3 to return blank class codes as well as issue/expire dates? I just want to be clear on how best to deal with these potentially unexpected situations.

Also, thanks for the info on the addition info validation in **CDL1.2.2.3 Data Look-up Errors**. I'm sure this can be found in the specs but can you tell me how I can determine the SOI is a S2S per request SB/SG?

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver H

This email comes from an external source, so remember, Think Before You Click!

Regarding G4, we started off Driver G as a CDL = Y and doc type = 1 but changed it to Non CDL and doc type = 3 in test case G3(hence you received SC with doc type 3).

So, on G4 all the information that AI usually sends for a doc type 3, is expected.

Please let me know if this helps or you need more information.

Thank you for sending H3 again.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver H

H3 has been sent.

Regarding the G4 problem, this relates to a fix I previously made with ranking the driver class. In this case, the SC was sent with a doc type of 3. I would have expected that no license class info would be returned since the driver only has a CDL. Hence, since I populated the issue/expire date of the CDL I had considered that was a problem and they should be blank.

So does it ever matter if the doc type is specified in the inquiry? For SC/SD requests, I am adhering to the requested doc type and for SB/SG I am ranking the class per the specs.

Let me know where I went wrong.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver H

Well, the UD erred because the SSN substitution failed to correctly populate BPES2. So this will require a fix.

I did put a fix in for the DOB/name alias alignment as well as the system release code on H1. Can we go back to G4 and retry the search inquiry?

This email comes from an external source, so remember, Think Before You Click!

Good Morning Gary,

For this driver, we mainly want to make sure that a State is able to change the CDLIS pointer from N to Y during the CSOR.

Also, we do not need the permit as well. So, when AI sends the UD, please send with old Doc type = 1 (We've added the P3 pointer with Doc Type = 1); Old CDLIS as N and New CDLIS as Y. So, Alaska will be creating a CDL for the driver.

Please let me know of any questions.

Thank you,

Siri.

Yes, this is a good break point.

Also, the doc type is documented as 2 for the P3 driver, although it was 1 in the RD.

Talk to you tomorrow.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver F

The fix that aligns the DOB aliases with names was not in the last deployment. Also, the H1 system release code was applied to SB/SD responses but apparently missed on SC/SG responses, which will require a fix.

These two fixes may take about an hour, but I realize you have a short day. Would you prefer to skip to another test?

I also anticipate G7/G8 validations will fail.

Gary,

Sure. If you are ready today, just let me know and we can continue.

Thursday and Friday, I am out of office.

Thursday, Siri can help you till 1:30 PM (EST) and Friday you can continue with her till 3:30 PM (EST).

Let me know if you have any questions.

Thanks,  
Asma

Ok, thanks.

I likely will be unable to test for the next hour or two while we deal with unrelated pressing issues.

If I am able to get a quick fix in for any of the new bugs today we may be able to continue testing; otherwise we likely will need to start again tomorrow. I'll let you know the situation in the next hour or so.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver G

The UC returned error: SSN NOT ALLOWED FOR NON-CDLIS POINTER

Just to clarify, since the old pointer was CDLIS, it should have the full SSN (DDVSS1) as well as the last 5 digits (BPES2). But since the new pointer is non-CDLIS, only the last 5 digits (BPESD) should be populated with a blank SSN (DDVSS6), correct?

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver F

Sure, let me make sure I understand the Driver G setup. Since he will have CDLIS pointer, I will create a commercial license. For the pseudo SSN, do I assign 000376666 to the driver? Or do I instead create a normal SSN and this one is just used for inquiry, etc? We have validations that prevent entry of this type of SSN so just want to have a better understanding of the business scenario.

This email comes from an external source, so remember, Think Before You Click!

Gary,

In Test Case # G3, AI sends UC message and the CDLIS Pinter Indicator is changed from 'Y' to 'N'.

Driver G ( DLN '7685500' ) , still shows the CDLIS Pointer Indicator as 'Y' .

Can you please look.

Thanks,  
Asma

Regarding your first question, I'll need to get back to you ( Since you will be leaving soon today, I'll have it to you by Monday)

For the second question: on the SG/SB message you receive, there is a SPEXS Functional role code(DCDFRC), you can use the value in this field to determine if the State is a S2S State(if this value is 2, it's a S2S State).

Thank you

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver H

Thanks, the test scenario wasn't clear to me. But say hypothetically I had a pointer for a ID but for some reason the driver had a DL (in other words, the pointer somehow was incorrectly managed), would you expect a SC for doc type 3 to return blank class codes as well as issue/expire dates? I just want to be clear on how best to deal with these potentially unexpected situations.

Also, thanks for the info on the addition info validation in **CDL1.2.2.3 Data Look-up Errors**. I'm sure this can be found in the specs but can you tell me how I can determine the SOI is a S2S per request SB/SG?

This email comes from an external source, so remember, Think Before You Click!

Regarding G4, we started off Driver G as a CDL = Y and doc type = 1 but changed it to Non CDL and doc type = 3 in test case G3(hence you received SC with doc type 3).

So, on G4 all the information that AI usually sends for a doc type 3, is expected.

Please let me know if this helps or you need more information.

Thank you for sending H3 again.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver H

H3 has been sent.

Regarding the G4 problem, this relates to a fix I previously made with ranking the driver class. In this case, the SC was sent with a doc type of 3. I would have expected that no license class info would be returned since the driver only has a CDL. Hence, since I populated the issue/expire date of the CDL I had considered that was a problem and they should be blank.

So does it ever matter if the doc type is specified in the inquiry? For SC/SD requests, I am adhering to the requested doc type and for SB/SG I am ranking the class per the specs.

Let me know where I went wrong.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver H

Well, the UD erred because the SSN substitution failed to correctly populate BPES2. So this will require a fix.

I did put a fix in for the DOB/name alias alignment as well as the system release code on H1. Can we go back to G4 and retry the search inquiry?

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver H

This email comes from an external source, so remember, Think Before You Click!

Good Morning Gary,

For this driver, we mainly want to make sure that a State is able to change the CDLIS pointer from N to Y during the CSOR.

Also, we do not need the permit as well. So, when AI sends the UD, please send with old Doc type = 1 (We've added the P3 pointer with Doc Type = 1); Old CDLIS as N and New CDLIS as Y. So, Alaska will be creating a CDL for the driver.

Please let me know of any questions.

Thank you,  
Siri.

The fix that aligns the DOB aliases with names was not in the last deployment. Also, the H1 system release code was applied to SB/SD responses but apparently missed on SC/SG responses, which will require a fix.

These two fixes may take about an hour, but I realize you have a short day. Would you prefer to skip to another test?

I also anticipate G7/G8 validations will fail.

Ok, F5 looked good but for F6, I received 'ERROR PROCESSING REQUEST' instead of 'REQUESTED RECORD NOT FOUND – ADDL INFO MISMATCH (#1)'.

Could you please take a look?

Thank you

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver F

In the F4 instructions it depicts both the pointer SSN and duplicate SSN as 111999999:

- Driver Social Security Number (DDVSS6) = 111999999
- Duplicate Driver Social Security Number (DDVSS8) = 111999999

Can I assume the DDVSS6 should still be the substitute SSN?

The UC returned error: SSN NOT ALLOWED FOR NON-CDLIS POINTER

Just to clarify, since the old pointer was CDLIS, it should have the full SSN (DDVSS1) as well as the last 5 digits (BPES2). But since the new pointer is non-CDLIS, only the last 5 digits (BPESD) should be populated with a blank SSN (DDVSS6), correct?

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver F

Sure, let me make sure I understand the Driver G setup. Since he will have CDLIS pointer, I will create a commercial license. For the pseudo SSN, do I assign 000376666 to the driver? Or do I instead create a normal SSN and this one is just used for inquiry, etc? We have validations that prevent entry of this type of SSN so just want to have a better understanding of the business scenario.

This email comes from an external source, so remember, Think Before You Click!

Regarding your first question, I'll need to get back to you ( Since you will be leaving soon today, I'll have it to you by Monday)

For the second question: on the SG/SB message you receive, there is a SPEXS Functional role code(DCDFRC), you can use the value in this field to determine if the State is a S2S State(if this value is 2, it's a S2S State).

Thank you

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver H

Thanks, the test scenario wasn't clear to me. But say hypothetically I had a pointer for a ID but for some reason the driver had a DL (in other words, the pointer somehow was incorrectly managed), would you expect a SC for doc type 3 to return blank class codes as well as issue/expire dates? I just want to be clear on how best to deal with these potentially unexpected situations.

Also, thanks for the info on the addition info validation in **CDL1.2.2.3 Data Look-up Errors**. I'm sure this can be found in the specs but can you tell me how I can determine the SOI is a S2S per request SB/SG?

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver H

This email comes from an external source, so remember, Think Before You Click!

Regarding G4, we started off Driver G as a CDL = Y and doc type = 1 but changed it to Non CDL and doc type = 3 in test case G3(hence you received SC with doc type 3).

So, on G4 all the information that AI usually sends for a doc type 3, is expected.

Please let me know if this helps or you need more information.

Thank you for sending H3 again.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver H

H3 has been sent.

Regarding the G4 problem, this relates to a fix I previously made with ranking the driver class. In this case, the SC was sent with a doc type of 3. I would have expected that no license class info would be returned since the driver only has a CDL. Hence, since I populated the issue/expire date of the CDL I had considered that was a problem and they should be blank.

So does it ever matter if the doc type is specified in the inquiry? For SC/SD requests, I am adhering to the requested doc type and for SB/SG I am ranking the class per the specs.

Let me know where I went wrong.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver H

This email comes from an external source, so remember, Think Before You Click!

Good Morning Gary,

For this driver, we mainly want to make sure that a State is able to change the CDLIS pointer from N to Y during the CSOR.

Also, we do not need the permit as well. So, when AI sends the UD, please send with old Doc type = 1 (We've added the P3 pointer with Doc Type = 1); Old CDLIS as N and New CDLIS as Y. So, Alaska will be creating a CDL for the driver.

Please let me know of any questions.

Thank you,

Siri.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver H

Yes, this is a good break point.

Also, the doc type is documented as 2 for the P3 driver, although it was 1 in the RD.

Talk to you tomorrow.

I'm thinking it should be a CDLIS = N but will need to confirm this with our team. Is it ok if we continue tomorrow with this? By that time, I'll have the answer.

Thank you

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver H

Please help me understand the scenario. Since the P3 driver has a non-CDL permit, yet the CSOR is for a CDLIS = Y, is the expectation that AI is creating a CDL for the driver or a permit?

The fix that aligns the DOB aliases with names was not in the last deployment. Also, the H1 system release code was applied to SB/SD responses but apparently missed on SC/SG responses, which will require a fix.

These two fixes may take about an hour, but I realize you have a short day. Would you prefer to skip to another test?

I also anticipate G7/G8 validations will fail.

Gary,

I just sent G4 and wanted to ask about the AKA DOB. I see 3 AKA Names but only 2 AKA DOB.

And also the GMSSRL , System Release code was empty on the H1 message. I think you had fixed that in a previous driver stream?

Could you please take a look?

Thank you

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver G

The UC returned error: SSN NOT ALLOWED FOR NON-CDLIS POINTER

Just to clarify, since the old pointer was CDLIS, it should have the full SSN (DDVSS1) as well as the last 5 digits (BPSS2). But since the new pointer is non-CDLIS, only the last 5 digits (BPSSD) should be populated with a blank SSN (DDVSS6), correct?

This email comes from an external source, so remember, Think Before You Click!

Gary,

If AI cannot add a pointer with a Pseudo SSN, you can add Driver G with Assigned SSN.

Let me Know if you have any question.

Thanks,  
Asma

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver F

Sure, let me make sure I understand the Driver G setup. Since he will have CDLIS pointer, I will create a commercial license. For the pseudo SSN, do I assign 000376666 to the driver? Or do I instead create a normal SSN and this one is just used for inquiry, etc? We have validations that prevent entry of this type of SSN so just want to have a better understanding of the business scenario.

This email comes from an external source, so remember, Think Before You Click!

Regarding your first question, I'll need to get back to you ( Since you will be leaving soon today, I'll have it to you by Monday)

For the second question: on the SG/SB message you receive, there is a SPEXS Functional role code(DCDFRC), you can use the value in this field to determine if the State is a S2S State(if this value is 2, it's a S2S State).

Thank you

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver H

Thanks, the test scenario wasn't clear to me. But say hypothetically I had a pointer for a ID but for some reason the driver had a DL (in other words, the pointer somehow was incorrectly managed), would you expect a SC for doc type 3 to return blank class codes as well as issue/expire dates? I just want to be clear on how best to deal with these potentially unexpected situations.

Also, thanks for the info on the addition info validation in **CDL1.2.2.3 Data Look-up Errors**. I'm sure this can be found in the specs but can you tell me how I can determine the SOI is a S2S per request SB/SG?

This email comes from an external source, so remember, Think Before You Click!

Regarding G4, we started off Driver G as a CDL = Y and doc type = 1 but changed it to Non CDL and doc type = 3 in test case G3(hence you received SC with doc type 3).

So, on G4 all the information that AI usually sends for a doc type 3, is expected.

Please let me know if this helps or you need more information.

Thank you for sending H3 again.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver H

H3 has been sent.

Regarding the G4 problem, this relates to a fix I previously made with ranking the driver class. In this case, the SC was sent with a doc type of 3. I would have expected that no license class info would be returned since the driver only has a CDL. Hence, since I populated the issue/expire date of the CDL I had considered that was a problem and they should be blank.

So does it ever matter if the doc type is specified in the inquiry? For SC/SD requests, I am adhering to the requested doc type and for SB/SG I am ranking the class per the specs.

Let me know where I went wrong.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver H

This email comes from an external source, so remember, Think Before You Click!  
Good Morning Gary,

For this driver, we mainly want to make sure that a State is able to change the CDLIS pointer from N to Y during the CSOR.

Also, we do not need the permit as well. So, when AI sends the UD, please send with old Doc type = 1 (We've added the P3 pointer with Doc Type = 1); Old CDLIS as N and New CDLIS as Y. So, Alaska will be creating a CDL for the driver.

Please let me know of any questions.

Thank you,

Siri.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver F

In the F4 instructions it depicts both the pointer SSN and duplicate SSN as 111999999:

- Driver Social Security Number (DDVSS6) = 111999999
- Duplicate Driver Social Security Number (DDVSS8) = 111999999

Can I assume the DDVSS6 should still be the substitute SSN?

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver G

The UC returned error: SSN NOT ALLOWED FOR NON-CDLIS POINTER

Just to clarify, since the old pointer was CDLIS, it should have the full SSN (DDVSS1) as well as the last 5 digits (BPES2). But since the new pointer is non-CDLIS, only the last 5 digits (BPESD) should be populated with a blank SSN (DDVSS6), correct?

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver F

Sure, let me make sure I understand the Driver G setup. Since he will have CDLIS pointer, I will create a commercial license. For the pseudo SSN, do I assign 000376666 to the driver? Or do I instead create a normal SSN and this one is just used for inquiry, etc? We have validations that prevent entry of this type of SSN so just want to have a better understanding of the business scenario.

Regarding your first question, I'll need to get back to you ( Since you will be leaving soon today, I'll have it to you by Monday)

For the second question: on the SG/SB message you receive, there is a SPEXS Functional role code(DCDFRC), you can use the value in this field to determine if the State is a S2S State(if this value is 2, it's a S2S State).

Thank you

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver H

Thanks, the test scenario wasn't clear to me. But say hypothetically I had a pointer for a ID but for some reason the driver had a DL (in other words, the pointer somehow was incorrectly managed), would you expect a SC for doc type 3 to return blank class codes as well as issue/expire dates? I just want to be clear on how best to deal with these potentially unexpected situations.

Also, thanks for the info on the addition info validation in **CDL1.2.2.3 Data Look-up Errors**. I'm sure this can be found in the specs but can you tell me how I can determine the SOI is a S2S per request SB/SG?

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver H

This email comes from an external source, so remember, Think Before You Click!

Regarding G4, we started off Driver G as a CDL = Y and doc type = 1 but changed it to Non CDL and doc type = 3 in test case G3(hence you received SC with doc type 3).

So, on G4 all the information that AI usually sends for a doc type 3, is expected.

Please let me know if this helps or you need more information.

Thank you for sending H3 again.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver H

H3 has been sent.

Regarding the G4 problem, this relates to a fix I previously made with ranking the driver class. In this case, the SC was sent with a doc type of 3. I would have expected that no license class info would be returned since the driver only has a CDL. Hence, since I populated the issue/expire date of the CDL I had considered that was a problem and they should be blank.

So does it ever matter if the doc type is specified in the inquiry? For SC/SD requests, I am adhering to the requested doc type and for SB/SG I am ranking the class per the specs.

Let me know where I went wrong.

This email comes from an external source, so remember, Think Before You Click!

Good Morning Gary,

For this driver, we mainly want to make sure that a State is able to change the CDLIS pointer from N to Y during the CSOR.

Also, we do not need the permit as well. So, when AI sends the UD, please send with old Doc type = 1 (We've added the P3 pointer with Doc Type = 1); Old CDLIS as N and New CDLIS as Y. So, Alaska will be creating a CDL for the driver.

Please let me know of any questions.

Thank you,  
Siri.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver H

Yes, this is a good break point.

Also, the doc type is documented as 2 for the P3 driver, although it was 1 in the RD.

Talk to you tomorrow.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver H

Please help me understand the scenario. Since the P3 driver has a non-CDL permit, yet the CSOR is for a CDLIS = Y, is the expectation that AI is creating a CDL for the driver or a permit?

The fix that aligns the DOB aliases with names was not in the last deployment. Also, the H1 system release code was applied to SB/SD responses but apparently missed on SC/SG responses, which will require a fix.

These two fixes may take about an hour, but I realize you have a short day. Would you prefer to skip to another test?

I also anticipate G7/G8 validations will fail.

Gary,

I just sent G4 and wanted to ask about the AKA DOB. I see 3 AKA Names but only 2 AKA DOB.

And also the GMSSRL , System Release code was empty on the H1 message. I think you had fixed that in a previous driver stream?

Could you please take a look?

Thank you

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver G

The UC returned error: SSN NOT ALLOWED FOR NON-CDLIS POINTER

Just to clarify, since the old pointer was CDLIS, it should have the full SSN (DDVSS1) as well as the last 5 digits (BPSS2). But since the new pointer is non-CDLIS, only the last 5 digits (BPSSD) should be populated with a blank SSN (DDVSS6), correct?

Gary,

If AI cannot add a pointer with a Pseudo SSN, you can add Driver G with Assigned SSN.

Let me know if you have any question.

Thanks,

Asma

**Cc:** Mina Peters, AK Dept. of Administration <[mina.peters@alaska.gov](mailto:mina.peters@alaska.gov)>; Singaraju, Sruti <[ssingaraju@aamva.org](mailto:ssingaraju@aamva.org)>

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver F

Sure, let me make sure I understand the Driver G setup. Since he will have CDLIS pointer, I will create a commercial license. For the pseudo SSN, do I assign 000376666 to the driver? Or do I instead create a normal SSN and this one is just used for inquiry, etc? We have validations that prevent entry of this type of SSN so just want to have a better understanding of the business scenario.

This email comes from an external source, so remember, Think Before You Click!  
Gary,

In Test Case # G3, AI sends UC message and the CDLIS Pinter Indicator is changed from 'Y' to 'N'.

Driver G ( DLN '7685500' ) , still shows the CDLIS Pointer Indicator as 'Y' .

Can you please look.

Thanks,  
Asma

Regarding your first question, I'll need to get back to you ( Since you will be leaving soon today, I'll have it to you by Monday)

For the second question: on the SG/SB message you receive, there is a SPEXS Functional role code(DCDFRC), you can use the value in this field to determine if the State is a S2S State(if this value is 2, it's a S2S State).

Thank you

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver H

Thanks, the test scenario wasn't clear to me. But say hypothetically I had a pointer for a ID but for some reason the driver had a DL (in other words, the pointer somehow was incorrectly managed), would you expect a SC for doc type 3 to return blank class codes as well as issue/expire dates? I just want to be clear on how best to deal with these potentially unexpected situations.

Also, thanks for the info on the addition info validation in **CDL1.2.2.3 Data Look-up Errors**. I'm sure this can be found in the specs but can you tell me how I can determine the SOI is a S2S per request SB/SG?

This email comes from an external source, so remember, Think Before You Click!

Regarding G4, we started off Driver G as a CDL = Y and doc type = 1 but changed it to Non CDL and doc type = 3 in test case G3(hence you received SC with doc type 3).

So, on G4 all the information that AI usually sends for a doc type 3, is expected.

Please let me know if this helps or you need more information.

Thank you for sending H3 again.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver H

H3 has been sent.

Regarding the G4 problem, this relates to a fix I previously made with ranking the driver class. In this case, the SC was sent with a doc type of 3. I would have expected that no license class info would be returned since the driver only has a CDL. Hence, since I populated the issue/expire date of the CDL I had considered that was a problem and they should be blank.

So does it ever matter if the doc type is specified in the inquiry? For SC/SD requests, I am adhering to the requested doc type and for SB/SG I am ranking the class per the specs.

Let me know where I went wrong.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver H

Well, the UD erred because the SSN substitution failed to correctly populate BPES2. So this will require a fix.

I did put a fix in for the DOB/name alias alignment as well as the system release code on H1. Can we go back to G4 and retry the search inquiry?

This email comes from an external source, so remember, Think Before You Click!  
Good Morning Gary,

For this driver, we mainly want to make sure that a State is able to change the CDLIS pointer from N to Y during the CSOR.

Also, we do not need the permit as well. So, when AI sends the UD, please send with old Doc type = 1 (We've added the P3 pointer with Doc Type = 1); Old CDLIS as N and New CDLIS as Y. So, Alaska will be creating a CDL for the driver.

Please let me know of any questions.

Thank you,  
Siri.

The fix that aligns the DOB aliases with names was not in the last deployment. Also, the H1 system release code was applied to SB/SD responses but apparently missed on SC/SG responses, which will require a fix.

These two fixes may take about an hour, but I realize you have a short day. Would you prefer to skip to another test?

I also anticipate G7/G8 validations will fail.

Ok, F5 looked good but for F6, I received 'ERROR PROCESSING REQUEST' instead of 'REQUESTED RECORD NOT FOUND – ADDL INFO MISMATCH (#1)'.

Could you please take a look?

Thank you

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver F

In the F4 instructions it depicts both the pointer SSN and duplicate SSN as 111999999:

- Driver Social Security Number (DDVSS6) = 111999999
- Duplicate Driver Social Security Number (DDVSS8) = 111999999

Can I assume the DDVSS6 should still be the substitute SSN?

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver G

The UC returned error: SSN NOT ALLOWED FOR NON-CDLIS POINTER

Just to clarify, since the old pointer was CDLIS, it should have the full SSN (DDVSS1) as well as the last 5 digits (BPES2). But since the new pointer is non-CDLIS, only the last 5 digits (BPESD) should be populated with a blank SSN (DDVSS6), correct?

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver F

Sure, let me make sure I understand the Driver G setup. Since he will have CDLIS pointer, I will create a commercial license. For the pseudo SSN, do I assign 000376666 to the driver? Or do I instead create a normal SSN and this one is just used for inquiry, etc? We have validations that prevent entry of this type of SSN so just want to have a better understanding of the business scenario.

Regarding your first question, I'll need to get back to you ( Since you will be leaving soon today, I'll have it to you by Monday)

For the second question: on the SG/SB message you receive, there is a SPEXS Functional role code(DCDFRC), you can use the value in this field to determine if the State is a S2S State(if this value is 2, it's a S2S State).

Thank you

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver H

Thanks, the test scenario wasn't clear to me. But say hypothetically I had a pointer for a ID but for some reason the driver had a DL (in other words, the pointer somehow was incorrectly managed), would you expect a SC for doc type 3 to return blank class codes as well as issue/expire dates? I just want to be clear on how best to deal with these potentially unexpected situations.

Also, thanks for the info on the addition info validation in **CDL1.2.2.3 Data Look-up Errors**. I'm sure this can be found in the specs but can you tell me how I can determine the SOI is a S2S per request SB/SG?

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver H

This email comes from an external source, so remember, Think Before You Click!

Regarding G4, we started off Driver G as a CDL = Y and doc type = 1 but changed it to Non CDL and doc type = 3 in test case G3(hence you received SC with doc type 3).

So, on G4 all the information that AI usually sends for a doc type 3, is expected.

Please let me know if this helps or you need more information.

Thank you for sending H3 again.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver H

H3 has been sent.

Regarding the G4 problem, this relates to a fix I previously made with ranking the driver class. In this case, the SC was sent with a doc type of 3. I would have expected that no license class info would be returned since the driver only has a CDL. Hence, since I populated the issue/expire date of the CDL I had considered that was a problem and they should be blank.

So does it ever matter if the doc type is specified in the inquiry? For SC/SD requests, I am adhering to the requested doc type and for SB/SG I am ranking the class per the specs.

Let me know where I went wrong.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver H

Well, the UD erred because the SSN substitution failed to correctly populate BPESS2. So this will require a fix.

I did put a fix in for the DOB/name alias alignment as well as the system release code on H1. Can we go back to G4 and retry the search inquiry?

This email comes from an external source, so remember, Think Before You Click!  
Good Morning Gary,

For this driver, we mainly want to make sure that a State is able to change the CDLIS pointer from N to Y during the CSOR.

Also, we do not need the permit as well. So, when AI sends the UD, please send with old Doc type = 1 (We've added the P3 pointer with Doc Type = 1); Old CDLIS as N and New CDLIS as Y. So, Alaska will be creating a CDL for the driver.

Please let me know of any questions.

Thank you,  
Siri.

Yes, this is a good break point.

Also, the doc type is documented as 2 for the P3 driver, although it was 1 in the RD.

Talk to you tomorrow.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver H

Please help me understand the scenario. Since the P3 driver has a non-CDL permit, yet the CSOR is for a CDLIS = Y, is the expectation that AI is creating a CDL for the driver or a permit?

The fix that aligns the DOB aliases with names was not in the last deployment. Also, the H1 system release code was applied to SB/SD responses but apparently missed on SC/SG responses, which will require a fix.

These two fixes may take about an hour, but I realize you have a short day. Would you prefer to skip to another test?

I also anticipate G7/G8 validations will fail.

Gary,

I just sent G4 and wanted to ask about the AKA DOB. I see 3 AKA Names but only 2 AKA DOB.

And also the GMSSRL , System Release code was empty on the H1 message. I think you had fixed that in a previous driver stream?

Could you please take a look?

Thank you

Gary,

Sure. If you are ready today, just let me know and we can continue.

Thursday and Friday, I am out of office.

Thursday, Siri can help you till 1:30 PM (EST) and Friday you can continue with her till 3:30 PM (EST).

Let me know if you have any questions.

Thanks,  
Asma

Ok, thanks.

I likely will be unable to test for the next hour or two while we deal with unrelated pressing issues.

If I am able to get a quick fix in for any of the new bugs today we may be able to continue testing; otherwise we likely will need to start again tomorrow. I'll let you know the situation in the next hour or so.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver G

The UC returned error: SSN NOT ALLOWED FOR NON-CDLIS POINTER

Just to clarify, since the old pointer was CDLIS, it should have the full SSN (DDVSS1) as well as the last 5 digits (BPES2). But since the new pointer is non-CDLIS, only the last 5 digits (BPESD) should be populated with a blank SSN (DDVSS6), correct?

This email comes from an external source, so remember, Think Before You Click!

Good Morning Gary,

For this driver, we mainly want to make sure that a State is able to change the CDLIS pointer from N to Y during the CSOR.

Also, we do not need the permit as well. So, when AI sends the UD, please send with old Doc type = 1 (We've added the P3 pointer with Doc Type = 1); Old CDLIS as N and New CDLIS as Y. So, Alaska will be creating a CDL for the driver.

Please let me know of any questions.

Thank you,  
Siri.

The fix that aligns the DOB aliases with names was not in the last deployment. Also, the H1 system release code was applied to SB/SD responses but apparently missed on SC/SG responses, which will require a fix.

These two fixes may take about an hour, but I realize you have a short day. Would you prefer to skip to another test?

I also anticipate G7/G8 validations will fail.

Gary,

I just sent G4 and wanted to ask about the AKA DOB. I see 3 AKA Names but only 2 AKA DOB.

And also the GMSSRL , System Release code was empty on the H1 message. I think you had fixed that in a previous driver stream?

Could you please take a look?

Thank you

Gary,

If AI cannot add a pointer with a Pseudo SSN, you can add Driver G with Assigned SSN.

Let me know if you have any question.

Thanks,

Asma

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver F

Sure, let me make sure I understand the Driver G setup. Since he will have CDLIS pointer, I will create a commercial license. For the pseudo SSN, do I assign 000376666 to the driver? Or do I instead create a normal SSN and this one is just used for inquiry, etc? We have validations that prevent entry of this type of SSN so just want to have a better understanding of the business scenario.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver H

Well, the UD erred because the SSN substitution failed to correctly populate BPESS2. So this will require a fix.

I did put a fix in for the DOB/name alias alignment as well as the system release code on H1. Can we go back to G4 and retry the search inquiry?

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver H

This email comes from an external source, so remember, Think Before You Click!

Good Morning Gary,

For this driver, we mainly want to make sure that a State is able to change the CDLIS pointer from N to Y during the CSOR.

Also, we do not need the permit as well. So, when AI sends the UD, please send with old Doc type = 1 (We've added the P3 pointer with Doc Type = 1); Old CDLIS as N and New CDLIS as Y. So, Alaska will be creating a CDL for the driver.

Please let me know of any questions.

Thank you,  
Siri.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver F

The fix that aligns the DOB aliases with names was not in the last deployment. Also, the H1 system release code was applied to SB/SD responses but apparently missed on SC/SG responses, which will require a fix.

These two fixes may take about an hour, but I realize you have a short day. Would you prefer to skip to another test?

I also anticipate G7/G8 validations will fail.

This email comes from an external source, so remember, Think Before You Click!

Gary,

I just sent G4 and wanted to ask about the AKA DOB. I see 3 AKA Names but only 2 AKA DOB.

And also the GMSSRL , System Release code was empty on the H1 message. I think you had fixed that in a previous driver stream?

Could you please take a look?

Thank you

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver H

Well, the UD erred because the SSN substitution failed to correctly populate BPES2. So this will require a fix.

I did put a fix in for the DOB/name alias alignment as well as the system release code on H1. Can we go back to G4 and retry the search inquiry?

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver H

This email comes from an external source, so remember, Think Before You Click!  
Good Morning Gary,

For this driver, we mainly want to make sure that a State is able to change the CDLIS pointer from N to Y during the CSOR.

Also, we do not need the permit as well. So, when AI sends the UD, please send with old Doc type = 1 (We've added the P3 pointer with Doc Type = 1); Old CDLIS as N and New CDLIS as Y. So, Alaska will be creating a CDL for the driver.

Please let me know of any questions.

Thank you,  
Siri.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver F

The fix that aligns the DOB aliases with names was not in the last deployment. Also, the H1 system release code was applied to SB/SD responses but apparently missed on SC/SG responses, which will require a fix.

These two fixes may take about an hour, but I realize you have a short day. Would you prefer to skip to another test?

I also anticipate G7/G8 validations will fail.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver F

In the F4 instructions it depicts both the pointer SSN and duplicate SSN as 111999999:

- Driver Social Security Number (DDVSS6) = 111999999
- Duplicate Driver Social Security Number (DDVSS8) = 111999999

Can I assume the DDVSS6 should still be the substitute SSN?

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver G

The UC returned error: SSN NOT ALLOWED FOR NON-CDLIS POINTER

Just to clarify, since the old pointer was CDLIS, it should have the full SSN (DDVSS1) as well as the last 5 digits (BPES2). But since the new pointer is non-CDLIS, only the last 5 digits (BPESD) should be populated with a blank SSN (DDVSS6), correct?

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver F

Sure, let me make sure I understand the Driver G setup. Since he will have CDLIS pointer, I will create a commercial license. For the pseudo SSN, do I assign 000376666 to the driver? Or do I instead create a normal SSN and this one is just used for inquiry, etc? We have validations that prevent entry of this type of SSN so just want to have a better understanding of the business scenario.

Gary,

Please proceed with H4 ( CSOR) .

I need to step out for lunch, and I will be back in an hour.

Thanks,  
Asma

Ok, I sent G4, the system release code is populated correctly now but I still see only 2 AKA DOBs on the HC message:

DDVDOB	DRIVER DATE OF BIRTH	1	19661211
DDVKDO	DRIVER AKA DATE OF BIRTH	1	19661117
DDVKDO	DRIVER AKA DATE OF BIRTH	2	19661116
DDVKDO	DRIVER AKA DATE OF BIRTH	3	

Thank you,  
Siri.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver H

Well, the UD erred because the SSN substitution failed to correctly populate BPESS2. So this will require a fix.

I did put a fix in for the DOB/name alias alignment as well as the system release code on H1. Can we go back to G4 and retry the search inquiry?

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver H

This email comes from an external source, so remember, Think Before You Click!

Good Morning Gary,

For this driver, we mainly want to make sure that a State is able to change the CDLIS pointer from N to Y during the CSOR.

Also, we do not need the permit as well. So, when AI sends the UD, please send with old Doc type = 1 (We've added the P3 pointer with Doc Type = 1); Old CDLIS as N and New CDLIS as Y. So, Alaska will be creating a CDL for the driver.

Please let me know of any questions.

Thank you,

Siri.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver F

The fix that aligns the DOB aliases with names was not in the last deployment. Also, the H1 system release code was applied to SB/SD responses but apparently missed on SC/SG responses, which will require a fix.

These two fixes may take about an hour, but I realize you have a short day. Would you prefer to skip to another test?

I also anticipate G7/G8 validations will fail.

I got an returned error SSN AND SSN TYPE MUST BE CONSISTENT.

Maybe I misunderstood the test instruction. It depicted SSN 111999999, however, I gather I should not have changed the SSN and instead only changed the name fields. Is that correct?

Hi Siri,

We skipped Driver F yesterday. I currently have the driver info set up and can begin with F1 and F2.

We ended yesterday with G3. I will need to update the driver and likely start with a new pointer. Let me know if you would rather pick up on Driver G.

thanks

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver G

The UC returned error: SSN NOT ALLOWED FOR NON-CDLIS POINTER

Just to clarify, since the old pointer was CDLIS, it should have the full SSN (DDVSS1) as well as the last 5 digits (BPES2). But since the new pointer is non-CDLIS, only the last 5 digits (BPESD) should be populated with a blank SSN (DDVSS6), correct?

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver F

Sure, let me make sure I understand the Driver G setup. Since he will have CDLIS pointer, I will create a commercial license. For the pseudo SSN, do I assign 000376666 to the driver? Or do I instead create a normal SSN and this one is just used for inquiry, etc? We have validations that prevent entry of this type of SSN so just want to have a better understanding of the business scenario.

This email comes from an external source, so remember, Think Before You Click!  
Ok, I sent G4, the system release code is populated correctly now but I still see only 2 AKA DOBs on the HC message:

✱	DDVDOB	DRIVER DATE OF BIRTH	1	19661211
✱	DDVKDO	DRIVER AKA DATE OF BIRTH	1	19661117
✱	DDVKDO	DRIVER AKA DATE OF BIRTH	2	19661116
✱	DDVKDO	DRIVER AKA DATE OF BIRTH	3	

Thank you,  
Siri.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver H

Well, the UD erred because the SSN substitution failed to correctly populate BPES2. So this will require a fix.

I did put a fix in for the DOB/name alias alignment as well as the system release code on H1. Can we go back to G4 and retry the search inquiry?

This email comes from an external source, so remember, Think Before You Click!

Good Morning Gary,

For this driver, we mainly want to make sure that a State is able to change the CDLIS pointer from N to Y during the CSOR.

Also, we do not need the permit as well. So, when AI sends the UD, please send with old Doc type = 1 (We've added the P3 pointer with Doc Type = 1); Old CDLIS as N and New CDLIS as Y. So, Alaska will be creating a CDL for the driver.

Please let me know of any questions.

Thank you,  
Siri.

Hi Siri,

We skipped Driver F yesterday. I currently have the driver info set up and can begin with F1 and F2.

We ended yesterday with G3. I will need to update the driver and likely start with a new pointer. Let me know if you would rather pick up on Driver G.

thanks

Gary,

Sure. If you are ready today, just let me know and we can continue.

Thursday and Friday, I am out of office.

Thursday, Siri can help you till 1:30 PM (EST) and Friday you can continue with her till 3:30 PM (EST).

Let me know if you have any questions.

Thanks,  
Asma

Ok, thanks.

I likely will be unable to test for the next hour or two while we deal with unrelated pressing issues.

If I am able to get a quick fix in for any of the new bugs today we may be able to continue testing; otherwise we likely will need to start again tomorrow. I'll let you know the situation in the next hour or so.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver G

The UC returned error: SSN NOT ALLOWED FOR NON-CDLIS POINTER

Just to clarify, since the old pointer was CDLIS, it should have the full SSN (DDVSS1) as well as the last 5 digits (BPES2). But since the new pointer is non-CDLIS, only the last 5 digits (BPESD) should be populated with a blank SSN (DDVSS6), correct?

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver F

Sure, let me make sure I understand the Driver G setup. Since he will have CDLIS pointer, I will create a commercial license. For the pseudo SSN, do I assign 000376666 to the driver? Or do I instead create a normal SSN and this one is just used for inquiry, etc? We have validations that prevent entry of this type of SSN so just want to have a better understanding of the business scenario.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver H

This email comes from an external source, so remember, Think Before You Click!

Good Morning Gary,

For this driver, we mainly want to make sure that a State is able to change the CDLIS pointer from N to Y during the CSOR.

Also, we do not need the permit as well. So, when AI sends the UD, please send with old Doc type = 1 (We've added the P3 pointer with Doc Type = 1); Old CDLIS as N and New CDLIS as Y. So, Alaska will be creating a CDL for the driver.

Please let me know of any questions.

Thank you,  
Siri.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver H

Yes, this is a good break point.

Also, the doc type is documented as 2 for the P3 driver, although it was 1 in the RD.

Talk to you tomorrow.

I'm thinking it should be a CDLIS = N but will need to confirm this with our team. Is it ok if we continue tomorrow with this? By that time, I'll have the answer.

Thank you

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver H

Please help me understand the scenario. Since the P3 driver has a non-CDL permit, yet the CSOR is for a CDLIS = Y, is the expectation that AI is creating a CDL for the driver or a permit?

The fix that aligns the DOB aliases with names was not in the last deployment. Also, the H1 system release code was applied to SB/SD responses but apparently missed on SC/SG responses, which will require a fix.

These two fixes may take about an hour, but I realize you have a short day. Would you prefer to skip to another test?

I also anticipate G7/G8 validations will fail.

Gary,

I just sent G4 and wanted to ask about the AKA DOB. I see 3 AKA Names but only 2 AKA DOB.

And also the GMSSRL , System Release code was empty on the H1 message. I think you had fixed that in a previous driver stream?

Could you please take a look?

Thank you

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver G

The UC returned error: SSN NOT ALLOWED FOR NON-CDLIS POINTER

Just to clarify, since the old pointer was CDLIS, it should have the full SSN (DDVSS1) as well as the last 5 digits (BPES2). But since the new pointer is non-CDLIS, only the last 5 digits (BPESD) should be populated with a blank SSN (DDVSS6), correct?

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver F

Sure, let me make sure I understand the Driver G setup. Since he will have CDLIS pointer, I will create a commercial license. For the pseudo SSN, do I assign 000376666 to the driver? Or do I instead create a normal SSN and this one is just used for inquiry, etc? We have validations that prevent entry of this type of SSN so just want to have a better understanding of the business scenario.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver H

This email comes from an external source, so remember, Think Before You Click!

Good Morning Gary,

For this driver, we mainly want to make sure that a State is able to change the CDLIS pointer from N to Y during the CSOR.

Also, we do not need the permit as well. So, when AI sends the UD, please send with old Doc type = 1 (We've added the P3 pointer with Doc Type = 1); Old CDLIS as N and New CDLIS as Y. So, Alaska will be creating a CDL for the driver.

Please let me know of any questions.

Thank you,  
Siri.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver H

Please help me understand the scenario. Since the P3 driver has a non-CDL permit, yet the CSOR is for a CDLIS = Y, is the expectation that AI is creating a CDL for the driver or a permit?

---

The fix that aligns the DOB aliases with names was not in the last deployment. Also, the H1 system release code was applied to SB/SD responses but apparently missed on SC/SG responses, which will require a fix.

These two fixes may take about an hour, but I realize you have a short day. Would you prefer to skip to another test?

I also anticipate G7/G8 validations will fail.

Gary,

I just sent G4 and wanted to ask about the AKA DOB. I see 3 AKA Names but only 2 AKA DOB.

And also the GMSSRL , System Release code was empty on the H1 message. I think you had fixed that in a previous driver stream?

Could you please take a look?

Thank you

Gary,

If AI cannot add a pointer with a Pseudo SSN, you can add Driver G with Assigned SSN.

Let me Know if you have any question.

Thanks,  
Asma

**To:** Syeda, Asma <[ASyeda@aamva.org](mailto:ASyeda@aamva.org)>  
**Cc:** Mina Peters, AK Dept. of Administration <[mina.peters@alaska.gov](mailto:mina.peters@alaska.gov)>; Singaraju, Sruti <[ssingaraju@aamva.org](mailto:ssingaraju@aamva.org)>  
**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver F

Sure, let me make sure I understand the Driver G setup. Since he will have CDLIS pointer, I will create a commercial license. For the pseudo SSN, do I assign 000376666 to the driver? Or do I instead create a normal SSN and this one is just used for inquiry, etc? We have validations that prevent entry of this type of SSN so just want to have a better understanding of the business scenario.

This will require a fix. Bummer, we were on a nice roll this morning.

I was going to suggest we skip to Driver J, although the ability to add a pointer with doc type other than 1 or 3 is currently not allowed, although the functionality can be amended as required.

Both fixes likely can be resolved in a few hours. Let me know how you would like to proceed.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver K

This email comes from an external source, so remember, Think Before You Click!

Gary,

The IN message was sent with Driver Lic Number as 'P3DRIVERK66', Driver K's Lic number is 'DRIVERK66':

IN Message from AI:

022011707250815350000 1UNIIN 02020  
09101P3P3DRIVERK66 36666A  
10101 19661231  
10J01AIS2SEXCHGDRIVERK ALASKA DRIVERK  
10J02 DRIVERALASKA DRIVERK SR  
10N01NNNUUU

Can you please re-send # K1?

Thanks,  
Asma

**Importance:** High

Dear Fraud Exemplar Contacts~

You are receiving this email because your jurisdiction designated you as the Contact for Training Exemplars. If you are no longer the person of contact, please notify me immediately.

AAMVA knows how important it is for each jurisdiction to have sample documents to use with their training programs and has been working with the federal agencies to obtain sample documents suitable for training. I am happy to announce the United States Department of State /Bureau of Consular Affairs/Office of Fraud Preventions has provided AAMVA with **US Permanent Resident (LPR) and US Employment Authorization (EAD) cards**. We can provide two of each document per jurisdiction.

We also have a few extra **"Service Passports"** available if your jurisdiction is interested in obtaining them, please indicate it on the contact sheet.

Due to security reasons, we must request that each jurisdiction identify a primary and secondary contact in their jurisdiction to monitor and track the exemplars in order for us to disseminate these materials. By filling out and faxing in the form below, the individuals identified are accepting responsibility for the exemplars the jurisdictions receive. If they are stolen or misplaced they will need to notify AAMVA immediately.

If your jurisdiction is interested in obtaining training samples, please fill out the attached form and email it back to me.

Your assistance is appreciated. If you have any questions or concerns, please feel free to contact me at 703.908.5767 or [dhanchulak@aamva.org](mailto:dhanchulak@aamva.org)

**To:** Syeda, Asma  
**Cc:** Singaraju, Sruti; Peters, Mina L (DOA)  
**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver K  
**Attachments:** H4.txt

**Follow Up Flag:** Follow up  
**Flag Status:** Flagged

From the uni log H4 looks consistent; but our internal data base log depicts a different alt control key value. I've attached a dump of the H4 message.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver K

This email comes from an external source, so remember, Think Before You Click!  
Gary,

The IN message was sent with Driver Lic Number as 'P3DRIVERK66', Driver K's Lic number is 'DRIVERK66':

IN Message from AI:

022011707250815350000 1UNIIN 02020  
09101P3P3DRIVERK66 36666A

10101 19661231  
10J01AIS2SEXCHGDRIVERK ALASKA DRIVERK  
10J02 DRIVERALASKA DRIVERK SR  
10N01NNNUUU

Can you please re-send # K1?

Thanks,  
Asma

**NMVTIS Conference Call  
July 19, 2017**

The purpose of the call was to provide updates on various aspects of the project. Present on the call: AR, AZ, CA, CO, FL, IA, IN, KY, MD, MA, MI, MN, MO, MT, NB, ND, NV, NH, ND, PA, SD, TX, WA, WY and AAMVA staff.

**Minnesota implementation of NMVTIS Web Services - Announcement**

The State of Minnesota is going to be the first state to implement Web Services who is going live on Monday the July 24<sup>th</sup> 2017.

After more than one year of intense software development using an agile methodology, Minnesota has taken a giant step forward being the first jurisdiction to complete a NMVTIS Web Services implementation. This effort coincides with Minnesota's Licensing and Registration System (MNLARS) project, a multi-year initiative of Driver and Vehicle Services (DVS) to replace its 30-year old legacy IT system. Web Services allow states to manage complex data exchanges with the Central Site more effectively using modern web based technologies and industry standards. We encourage other states to consider Web Services as part of their system modernization effort.

AAMVA – Thanks to Minnesota for completing the web service implementation, also thanks to AZ and NH for helping us to verify MN's implementation by participating in testing activity.

**New Webinar for Online States – Suspense Resolution**

The business reason for providing this webinar is that many of the online states are requesting the AAMVA Help Desk to reset CSOT flag when transactions have suspended. States should attempt to resolve suspensions themselves by restarting or re-driving messages instead of sending a Change Data Request Form to the AAMVA helpdesk.

This webinar is to educate the online states how to best resolve suspended transactions. States can register on AAMVA website to attend this webinar which is going to start on July 27<sup>th</sup>. The webinar is broken into two parts, one for NM06-Change State of Title Transaction and second for NM07-Change State of Title Undo.

The intended audience for this webinar are NMVTIS Helpdesk Personnel, Business Process Analyst and IT System integrators.

**Question** – Does this webinar covers how to make change in UNI application itself or cover only the business process on Suspensions?

AAMVA – Yes, the webinar shows how to identify the state of suspension using CSOT flag, provide the recommendations based on the state of CSOT flag and suggest the correct approach to resolve such suspension. It shows the states how to redrive the messages from the UNI application.

AAMVA Request – We encourage states to provide us feedback which helps us to improve on this webinar. Also if states need webinars on any other NMVTIS related topics, bring it up and we will be happy to work on it.

### **State Web Interface hyperlink**

A year ago AAMVA rolled out a new version of SWI 3.0 which displays the state vehicle data. A new URL was provided to the states for SWI 3.0 to replace the SWI 2.0 URL. We noticed that some users continued to use the old SWI 2.0 URL.

AAMVA has been redirecting the user to SWI 3.0, even if the user uses the old SWI 2.0 URL. Starting from July 31st, when users try to access SWI using the old URL, AAMVA will display a message on their screen asking them to use the new URL.

State users of SWI who are still using the old URL should change their favorites or shortcuts to the new URL. State users can reach out to their IT helpdesk to get those favorites fixed if someone doesn't know how to add the new link to favorites.

### **Availability of the new Brand Code "Hazardous Substance Contaminated Vehicle"**

AAMVA will make available this new Brand in production on August 1, 2017. If any state wants to report this brand to NMVTIS, that state has to contact AAMVA helpdesk, should update their brand mapping and perform regression testing with us. After the testing process is completed, AAMVA will authorize the state to start reporting that brand to NMVTIS. This process applies even if a state is going to add this Brand using SWI.

If a state is performing inquiry on a VIN which has this new brand associated, that brand will be reported to the state with the brand code and brand date. There is no changes on the state side if the state is just performing the inquiry.

The communication has been sent to all the Jurisdictions to inform that this new brand will be available starting August 1<sup>st</sup> 2017.

### **The Rhode Island Initial load**

On July 9th 2017 Rhode Island became a NMVTIS participant that performs batch inquiries and updates.

AAMVA loaded about 1.5 million title records and about 75K brand records into NMVTIS. The N\*messages were placed in each state's SFTP folder and communication email has been sent out to all the states after the initial load process was completed. If any state has not yet downloaded the N\*message file for processing, please download the file and process it.

### **NMVTIS State Program Funding**

AAMVA and DOJ are offering funding to states that are not fully participating in NMVTIS. This would include states that are not providing data or doing inquiries. The goal is to obtain 100% participation in NMVTIS. The applications were sent to the 13 eligible states about 6 weeks ago. Those applications are due to AAMVA on Tuesday, July 25, 2017. Please send the applications to [tmanuel@aamva.org](mailto:tmanuel@aamva.org).

### **Update to State Vehicle Record Request document**

The "State Vehicle Record Request" document is for consumers who are requesting the NMVTIS vehicle history report and want to get more information from the state of title.

AAMVA will be updating this document on the annual basis. Starting September of this year AAMVA will send current document to state NMVTIS Business Contact Person to update if the link is any different or if there is any change on how the consumer request vehicle tied up information in your state.

### **State Reminders**

- 1) MN implementation – Multiple email notifications for the MN Web Service implementation have been sent. We mentioned how to update the UNI Site Table to include MN as an online state, this needs to be done by online states before Monday 7/24. Also the batch states who generate unsolicited responses also need to update the UNI Site Table. The document was attached in the email notification sent out to all the states.
- 2) Use the proper reason codes when states are performing SWI updates or corrections. If the business reason is not part of the available reason codes, state could select “Other” and enter the business reason for that correction in the free form text. (But keep minimal use of selecting the “other”)
- 3) States sending the change data request forms, AAMVA do data corrections on behalf of states. But where states can do the corrections themselves, still such corrections are also been send to AAMVA helpdesk. AAMVA performs data corrections in NMVTIS on behalf of the states, when states request the correction using the Change Data Request Form. Most corrections can be made by states using SWI help desk functionality. The state should make every attempt to make the changes themselves. States should send to AAMVA, only the corrections which they cannot perform.  
For ex: Add Brand, Delete Brand etc., the state can do these changes themselves using SWI help desk functionality.  
Only changes which cannot be made by the states should be sent on the form.  
For Ex: Adding Duplicates, CSOT and CSOT Undo.

If you need training on how to perform data corrections using SWI, there is a webinar you can attend. – Next session is on Tue, Aug 22 from 2:00 PM - 3:00 PM EDT  
Topic -NMVTIS State Web Interface (SWI) – How to Correct Title and Brand Data on the Central Site

- 4) States should retrieve their N\* messages on daily basis and from the SFTP folder and process them to mark those records appropriately in your system
- 5) Online states have to handle suspended transactions and duplicate titles created- The state needs to work with other states to get resolution for the duplicates and suspended transactions. Online states receive daily Suspense report and Duplicate VIN report. States should review these reports daily and take appropriate action. For suspended transactions, no further update operations can be performed on that vehicle in NMVTIS until those suspended transactions are resolved. So it is important for the states to promptly address these issues.

**Questions:** None

**Next meeting:** Aug 16<sup>th</sup> @ 3PM

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver K

Hi Asma

For test J3, I am providing the capability to create a pointer with doc type of no document (8). The test also identifies real ID conformant = 8 for the pointer. In general, the AK system is preventing anything other than 2 for the Real ID Conformant when managing AK pointers; hence, it is not persisted. Is it necessary to provide this level of flexibility or can we use Real ID Conformant = 2?

Thanks  
Gary

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver K

Hi Asma

For test J3, I am providing the capability to create a pointer with doc type of no document (8). The test also identifies real ID conformant = 8 for the pointer. In general, the AK system is preventing anything other than 2 for the Real ID Conformant when managing AK pointers; hence, it is not persisted. Is it necessary to provide this level of flexibility or can we use Real ID Conformant = 2?

Thanks  
Gary

**Importance:** High

Alaska. Your connection to the NCS application has disconnected abnormally. This disconnection was not initiated by AAMVA and only affects your site. Please check your system logs (UNI and/or Network and Firewall) to identify what initiated this disconnection and reestablish your connectivity. Please provide AAMVA detailed information on the cause of this loss of connectivity.

AAMVA is also checking all dedicated resources. If it is determined that the cause of the problem is at any of AAMVA's dedicated resources we will let you know.

For UNI users, if you cannot determine the cause then please send the UNI IP log to UniHelpDesk@aamva.org.

UNI IP Log for CICS is the TCPM (TCPDATA) CICS System log.  
UNI IP Log for IMS is the UNI Error Log.  
UNI IP Log for Windows today's status log (UNI40\Data\Log).  
UNI IP Log for UNIX is the UNISES files in \$UNI\_DATA/uni/UNISES\*

**Follow Up Flag:** Follow up  
**Flag Status:** Completed

GM Gary,

We had a similar Driver Stream when we did the Structured Testing and Alaska was able to add the pointer with Real ID Conformant and State Doc Type as '8' and '8'.

May be we can wait for Mina and come back to Driver J.

Thanks,  
Asma

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver K

Hi Asma

For test J3, I am providing the capability to create a pointer with doc type of no document (8). The test also identifies real ID conformant = 8 for the pointer. In general, the AK system is preventing anything other than 2 for the Real ID Conformant when managing AK pointers; hence, it is not persisted. Is it necessary to provide this level of flexibility or can we use Real ID Conformant = 2?

Thanks  
Gary

**Subject:** National Driver Register Cleanfile - September 17, 2017

PDPS Participants:

The National Driver Register will conduct a Cleanfile on September 17<sup>th</sup>, 2017.

Cleanfile is an optional process. It is a means for jurisdictions to refresh the pointers it has on PDPS. NDR replaces all pointers on the PDPS file with the Cleanfile set of pointers sent by the jurisdiction. In order for a pointer to be included in the Cleanfile, the associated record in the jurisdiction must contain a conviction or withdrawal specified in 23 CFR Part 1327 section 1327.5 (a) or in Appendix A to that rule.

To participate in this Cleanfile, please email NDR by September 6<sup>th</sup>, 2017, and plan to send your file to NDR no later than September 13<sup>th</sup>, 2017.

Cleanfiles must be submitted via Secure FTP or FTP. Please schedule a test of SFTP/FTP connectivity with NDR before attempting to send the full Cleanfile.

If you plan to participate in this Cleanfile or if you have any questions please contact the NDR Office by sending an e-mail to [NDR\\_Operations@dot.gov](mailto:NDR_Operations@dot.gov)<[mailto:NDR\\_Operations@dot.gov](mailto:NDR_Operations@dot.gov)>.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver K

**Follow Up Flag:** Follow up  
**Flag Status:** Flagged

Apparently I introduced a bug whereby no change in SSN on the UD caused a substitute SSN to be sent instead. Hence, the UD was returned in error. This will require a fix.

Would you like to jump back to Driver I? I deployed a fix for the NI so I should be able to retry test I3.

**Sent:** Wednesday, July 26, 2017 6:49 AM  
**To:** Syeda, Asma  
**Cc:** Singaraju, Sruti; Peters, Mina L (DOA)  
**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver K

Apparently I introduced a bug whereby no change in SSN on the UD caused a substitute SSN to be sent instead. Hence, the UD was returned in error. This will require a fix.

Would you like to jump back to Driver I? I deployed a fix for the NI so I should be able to retry test I3.

This will require a fix. Bummer, we were on a nice roll this morning.

I was going to suggest we skip to Driver J, although the ability to add a pointer with doc type other than 1 or 3 is currently not allowed, although the functionality can be amended as required.

Both fixes likely can be resolved in a few hours. Let me know how you would like to proceed.

An error was returned on the UC: SSN AND LAST 5 SSN MUST BE CONSISTENT.

DDVSS6 was left blank. Just to clarify, even though this is a non-CDLIS pointer, the DDVSS6 should still be populated upon a change to the SSN, correct?

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver I

This email comes from an external source, so remember, Think Before You Click!

Also, the NI Message was missing State Doc Real ID (BJDRIC)

CD19.TRN. N.I.B. 900	State Document Type (BJDTYP)	CLMF-STATE-DOC-TYPE Format=Alpha-numeric Size=1	Set to the credential type of the card being issued by the NCI.			
CD19.TRN. N.I.B. 1000	State Document Real- ID Conformant (BJDRIC)	CLMF-REAL-ID-CONFORMANT Format=Alpha-numeric Size=1	Set to a value indicating whether or not the credential being issued by the NCI is REAL ID compliant.			

Can you please take a look?

Thanks,  
Asma

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver I

This will require a fix. Bummer, we were on a nice roll this morning.

I was going to suggest we skip to Driver J, although the ability to add a pointer with doc type other than 1 or 3 is currently not allowed, although the functionality can be amended as required.

Both fixes likely can be resolved in a few hours. Let me know how you would like to proceed.

This will require a fix. Bummer, we were on a nice roll this morning.

I was going to suggest we skip to Driver J, although the ability to add a pointer with doc type other than 1 or 3 is currently not allowed, although the functionality can be amended as required.

Both fixes likely can be resolved in a few hours. Let me know how you would like to proceed.

**Follow Up Flag:** Follow up  
**Flag Status:** Flagged

Unfortunately the generation of the UC is programmatic and I cannot intervene at that level without a code change.

Let me know how you suggest we proceed. The UD fix for driver K should be relatively quick, or maybe we skip to a new Driver scenario.

Also, regarding Driver D whereby we continue to work on the solution for the CSOR in progress inquiries- would you be willing to have a conference call with myself and another developer before you leave today?

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver I

Unfortunately the generation of the UC is programmatic and I cannot intervene at that level without a code change.

Let me know how you suggest we proceed. The UD fix for driver K should be relatively quick, or maybe we skip to a new Driver scenario.

Also, regarding Driver D whereby we continue to work on the solution for the CSOR in progress inquiries- would you be willing to have a conference call with myself and another developer before you leave today?

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver I

An error was returned on the UC:     SSN AND LAST 5 SSN MUST BE CONSISTENT.

DDVSS6 was left blank. Just to clarify, even though this is a non-CDLIS pointer, the DDVSS6 should still be populated upon a change to the SSN, correct?

Gary,

How long do you think it will take to fix the UD issue for Driver K?

For Driver D call, does 12:30 PM (EST) – 1:30 PM (EST) work for you?

Please let me know and I will send you the invite.

Thanks,  
Asma

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver I

Unfortunately the generation of the UC is programmatic and I cannot intervene at that level without a code change.

Let me know how you suggest we proceed. The UD fix for driver K should be relatively quick, or maybe we skip to a new Driver scenario.

Also, regarding Driver D whereby we continue to work on the solution for the CSOR in progress inquiries- would you be willing to have a conference call with myself and another developer before you leave today?

This will require a fix. Bummer, we were on a nice roll this morning.

I was going to suggest we skip to Driver J, although the ability to add a pointer with doc type other than 1 or 3 is currently not allowed, although the functionality can be amended as required.

Both fixes likely can be resolved in a few hours. Let me know how you would like to proceed.

**Subject:** RE: AI-SPEXS 6.0 Baseline Structured test plan - FP-Driver C

Gary,

When CSOR is in progress:

- 1) And the inquiry is sent, CS finds a match and the SC message is sent to the NSOR, and the NSOR sends the HC message back to the inquiring state with the error "CONFIRMATION OF NEW SOR, BUT DHR NOT READY":

CD11.TRN.HC.T. 0700	Processing Status (GPROST)	CLMF-CODE-MEC-PROCESS-STATUS Format=Alpha-numeric Size=2	<p>If the driver record is involved in a Change State of Record transaction at the time the inquiry is processed, and if the associated driver history has not yet been posted to the driver's record, then:</p> <ul style="list-style-type: none"> <li>Set to '05' and</li> <li>NCB Error Code (GNCBER) Set to 'Y'</li> </ul>	1-1	1-1	1-1	1-1
------------------------	----------------------------	---	--	-----	-----	-----	-----

11 Provide Detail On Requested Person (SOR)

1324

EXS Master Specification (AMIE), r6.0.9

AAMVA - Official Use Only

ID	Clear Name and Identifier	Implementation Name	Population Rules	Cardinality (min - max) based on SOR Implementation Release			
				CDLIS			CDLIS +S2S
				4.1	5.1	5.3	6.0
			<ul style="list-style-type: none"> <li>Error text : CONFIRMATION OF NEW SOR, BUT DHR NOT] READY</li> </ul> <p>Otherwise</p> <ul style="list-style-type: none"> <li>Set to '00' and</li> <li>NCB Error Code (GNCBER) Set to 'N'</li> </ul> <p>Note: Although the NCB Error Code is Set to 'Y', the other fields in the Status Response (HC) message are still populated as if no error has occurred.</p>				

2) And when SG is sent to the OSOR , a OSOR can only respond to the NSOR:

CD03.RTR V.SG. 0200	<p>Driver License Number (DDLNUM)</p> <p>Transaction Originator (GTRORG)</p>	<p>CLMF-CODE-NCB-TRANS-ORIGINATOR Format=Alpha-numeric Size=7</p> <p>CLMF-CODE-DLN-CURR Format=Alpha-numeric Size=25</p>	<p>If the record retrieved is a CDLIS record and if a Change State of Record (CSOR) is currently in progress involving the given driver, and if the Jurisdiction is the Old SOR, it can only respond with driver information if the Transaction Originator (GTRORG) of the inquiry message corresponds to the New SOR.</p> <p>If not issue the error message.</p>	x	x
---------------------------	--	--	---	---	---

3) And SG is sent to the NSOR:

CD03.RTR V.SG. 0300	Processing Status Flag (GPROST)	CLMF-CODE-MEC- PROCESS-STATUS Format=Alpha- numeric Size=2	If the record retrieved is a CDLIS record and if a CSOR is currently in progress involving the given driver, and if the Jurisdiction is the New SOR, it cannot respond with status information until the CSOR has successfully completed. In addition to returning the error text, the Jurisdiction populates the Processing Status Flag (GPROST) with '05'.	x	x
---------------------------	---------------------------------------	---	--	---	---

4) And SB is sent to the OSOR , a OSOR can only respond to the NSOR:

CD04.LKU P.SB. 0200	Driver License Number (DDLNUM)  Transaction Originator (GTRORG)	CLMF-CODE-NCB-TRANS- ORIGINATOR Format=Alpha-numeric Size=7  CLMF-CODE-DLN-CURR Format=Alpha- numeric Size=25	If the record retrieved is a CDLIS record and if a Change State of Record (CSOR) is currently in progress involving the given driver, and if the Jurisdiction is the Old SOR, it can only respond with driver information if the Transaction Originator (GTRORG) of the inquiry message corresponds to the New SOR.  If not issue the error message.	x	x
---------------------------	---	--	--	---	---

5) And SB is sent to the NSOR:

CD04.LKU P.SB. 0300	Processing Status Flag (GPROST)	CLMF-CODE-MEC- PROCESS-STATUS Format=Alpha- numeric Size=2	If the record retrieved is a CDLIS record and if a CSOR is currently in progress involving the given driver, and if the Jurisdiction is the New SOR, it cannot respond with status information until the CSOR has successfully completed. In addition to returning the error text, the Jurisdiction populates the Processing Status Flag (GPROST) with '05'.	x	x
---------------------------	---------------------------------------	---	--	---	---

6) When a UD message is sent while the CSOR is in progress, the UD message will be sent in error:

CD08. LKUP.UD. 300	For an 'original' request, confirm that the CSOR In Progress Flag is set to 'N', indicating that a CSOR is not yet in progress.	For an 'original' request, the associated Message SOR Change In Progress Indicator (GMSSCH) must = 'N'.	x	x	1
--------------------------	---	---	---	---	---

Let me know if you have any question, or if you want to have a call, I can set one.

Thanks,  
Asma

**Subject:** RE: AI-SPEXS 6.0 Baseline Structured test plan - FP-Driver C

Ok, so if the SD was processed but a NF has not been received, the NSOR is allowed to make state history inquiry (SB). Should the NSOR be allowed to receive responses from SC and SG requests as well?

And while in this incomplete CSOR, if some other state makes an inquiry, then they should receive NOT CURRENT SOR with match indicator = Y and process status = 1, correct? Would that apply to SC, SG and also SD requests?

Gary,

# D15 is sent when the CSOR is still in progress ( i.e., 'UD' message was sent and responses were received, but 'CC' message was not sent) .

When a CSOR is in progress, an OSOR can only respond to the NSOR :

CD04.LKU P.SB. 0200	Driver License Number (DDLNUM)  Transaction Originator (GTRORG)	CLMF-CODE-NCB-TRANS- ORIGINATOR Format=Alpha-numeric Size=7  CLMF-CODE-DLN-CURR Format=Alpha- numeric Size=25	If the record retrieved is a CDLIS record and if a Change State of Record (CSOR) is currently in progress involving the given driver, and if the Jurisdiction is the Old SOR, it can only respond with driver information if the Transaction Originator (GTRORG) of the inquiry message corresponds to the New SOR.  If not issue the error message.	x	x	x	x	NOT CURRENT SOR
---------------------------	---	--	---	---	---	---	---	-----------------

'CC' message is sent once # D15 and # D17 is completed.

Once the CSOR is completed, and the Jurisdiction is no longer the current SOR, it cannot respond with the status information ( Test Case # D17) :

CD04.LKU P.SB. 0400	Driver License Jurisdiction (DDLJUR)	CLMF-DRIVER-LICENSE- JURIS Format=Alpha- numeric Size=2	If the record retrieved is a ( if a CSOR is not currently in involving the given driver, ; Jurisdiction had been but is current SOR then the SOR c with status information.
---------------------------	--	---	---

Let me know if you have any questions.

Thanks,  
Asma

---

**Subject:** RE: AI-SPEXS 6.0 Baseline Structured test plan - FP-Driver C

Gary,

When CSOR is in progress:

- 1) And the inquiry is sent, CS finds a match and the SC message is sent to the NSOR, and the NSOR sends the HC message back to the inquiring state with the error "CONFIRMATION OF NEW SOR, BUT DHR NOT READY":

CD11.TRN.HC.T. 0700	Processing Status (GPROST)	CLMF-CODE-MEC-PROCESS-STATUS Format=Alpha-numeric Size=2	<p>If the driver record is involved in a Change State of Record transaction at the time the inquiry is processed, and if the associated driver history has not yet been posted to the driver's record, then:</p> <ul style="list-style-type: none"> <li>Set to '05' and</li> <li>NCB Error Code (GNCBER) Set to 'Y'</li> </ul>	1-1	1-1	1-1	1-1
------------------------	----------------------------	---	--	-----	-----	-----	-----

11 Provide Detail On Requested Person (SOR)

1324

EXS Master Specification (AMIE), r6.0.9

AAMVA - Official Use Only

ID	Clear Name and Identifier	Implementation Name	Population Rules	Cardinality (min - max) based on SOR Implementation Release			
				CDLIS			CDLIS +S2S
				4.1	5.1	5.3	6.0
			<ul style="list-style-type: none"> <li>Error text : CONFIRMATION OF NEW SOR, BUT DHR NOT] READY</li> </ul> <p>Otherwise</p> <ul style="list-style-type: none"> <li>Set to '00' and</li> <li>NCB Error Code (GNCBER) Set to 'N'</li> </ul> <p>Note: Although the NCB Error Code is Set to 'Y', the other fields in the Status Response (HC) message are still populated as if no error has occurred.</p>				

2) And when SG is sent to the OSOR , a OSOR can only respond to the NSOR:

CD03.RTR V.SG. 0200	<p>Driver License Number (DDLNUM)</p> <p>Transaction Originator (GTRORG)</p>	<p>CLMF-CODE-NCB-TRANS-ORIGINATOR Format=Alpha-numeric Size=7</p> <p>CLMF-CODE-DLN-CURR Format=Alpha-numeric Size=25</p>	<p>If the record retrieved is a CDLIS record and if a Change State of Record (CSOR) is currently in progress involving the given driver, and if the Jurisdiction is the Old SOR, it can only respond with driver information if the Transaction Originator (GTRORG) of the inquiry message corresponds to the New SOR.</p> <p>If not issue the error message.</p>	x	x
---------------------------	--	--	---	---	---

3) And SG is sent to the NSOR:

CD03.RTR V.SG. 0300	Processing Status Flag (GPROST)	CLMF-CODE-MEC- PROCESS-STATUS Format=Alpha- numeric Size=2	If the record retrieved is a CDLIS record and if a CSOR is currently in progress involving the given driver, and if the Jurisdiction is the New SOR, it cannot respond with status information until the CSOR has successfully completed. In addition to returning the error text, the Jurisdiction populates the Processing Status Flag (GPROST) with '05'.	x	x
---------------------------	---------------------------------------	---	--	---	---

4) And SB is sent to the OSOR , a OSOR can only respond to the NSOR:

CD04.LKU P.SB. 0200	Driver License Number (DDLNUM)  Transaction Originator (GTRORG)	CLMF-CODE-NCB-TRANS- ORIGINATOR Format=Alpha-numeric Size=7  CLMF-CODE-DLN-CURR Format=Alpha- numeric Size=25	If the record retrieved is a CDLIS record and if a Change State of Record (CSOR) is currently in progress involving the given driver, and if the Jurisdiction is the Old SOR, it can only respond with driver information if the Transaction Originator (GTRORG) of the inquiry message corresponds to the New SOR.  If not issue the error message.	x	x
---------------------------	---	--	--	---	---

5) And SB is sent to the NSOR:

CD04.LKU P.SB. 0300	Processing Status Flag (GPROST)	CLMF-CODE-MEC- PROCESS-STATUS Format=Alpha- numeric Size=2	If the record retrieved is a CDLIS record and if a CSOR is currently in progress involving the given driver, and if the Jurisdiction is the New SOR, it cannot respond with status information until the CSOR has successfully completed. In addition to returning the error text, the Jurisdiction populates the Processing Status Flag (GPROST) with '05'.	x	x
---------------------------	---------------------------------------	---	--	---	---

6) When a UD message is sent while the CSOR is in progress, the UD message will be sent in error:

CD08. LKUP.UD. 300	For an 'original' request, confirm that the CSOR In Progress Flag is set to 'N', indicating that a CSOR is not yet in progress.	For an 'original' request, the associated Message SOR Change In Progress Indicator (GMSSCH) must = 'N'.	x	x	1
--------------------------	---	---	---	---	---

Let me know if you have any question, or if you want to have a call, I can set one.

Thanks,  
Asma

**Subject:** RE: AI-SPEXS 6.0 Baseline Structured test plan - FP-Driver C

Ok, so if the SD was processed but a NF has not been received, the NSOR is allowed to make state history inquiry (SB). Should the NSOR be allowed to receive responses from SC and SG requests as well?

And while in this incomplete CSOR, if some other state makes an inquiry, then they should receive NOT CURRENT SOR with match indicator = Y and process status = 1, correct? Would that apply to SC, SG and also SD requests?

**Subject:** RE: AI-SPEXS 6.0 Baseline Structured test plan - FP-Driver C

This email comes from an external source, so remember, Think Before You Click!

Gary,

# D15 is sent when the CSOR is still in progress ( i.e., 'UD' message was sent and responses were received, but 'CC' message was not sent) .

When a CSOR is in progress, an OSOR can only respond to the NSOR :

CD04.LKU P.SB. 0200	Driver License Number (DDLNUM)  Transaction Originator (GTRORG)	CLMF-CODE-NCB-TRANS- ORIGINATOR Format=Alpha-numeric Size=7  CLMF-CODE-DLN-CURR Format=Alpha- numeric Size=25	If the record retrieved is a CDLIS record and if a Change State of Record (CSOR) is currently in progress involving the given driver, and if the Jurisdiction is the Old SOR, it can only respond with driver information if the Transaction Originator (GTRORG) of the inquiry message corresponds to the New SOR.  If not issue the error message.	x	x	x	x	NOT CURRENT SOR
---------------------------	---	--	---	---	---	---	---	-----------------

'CC' message is sent once # D15 and # D17 is completed.

Once the CSOR is completed, and the Jurisdiction is no longer the current SOR, it cannot respond with the status information ( Test Case # D17) :

CD04.LKU P.SB. 0400	Driver License Jurisdiction (DDLJUR)	CLMF-DRIVER-LICENSE- JURIS Format=Alpha- numeric Size=2	If the record retrieved is a ( if a CSOR is not currently in involving the given driver, ; Jurisdiction had been but is current SOR then the SOR c with status information.
---------------------------	--	---	---

Let me know if you have any questions.

Thanks,  
Asma

Gary,

Driver L is added with Permit Endorsement as 'S' and Driver License Permit Classification Code as 'CLASS C' .

'S' Endorsement require 'P' Endorsement on the HC message.

'S' or 'P' Endorsement requires 'P' Restriction on the H6 Message

'S' or 'P' Endorsement with DL Permit Class Code 'C' requires 'N' Restriction on the H6 Message

CDN1. H2. XCHK. 300	Driver License Permit Endorsement Group Code (DDLEP1)	CLMF-DESC-PERM-ENDORSE Format=Alpha-numeric Size=5	If one entry in any occurrence of Driver License Permit Endorsement Group Code (DDLEP1) is 'S', then one entry in the corresponding occurrence of Driver License Permit Endorsement Group Code (DDLEP1) must be 'P'.	H2
CDN1. H2. XCHK. 400	Driver License Permit Endorsement Group Code (DDLEP1)  Driver License 1st Permit Restrict Code (DDLRP1)	CLMF-DESC-PERM-ENDORSE Format=Alpha-numeric Size=5  CLMF-CODE-P1-RESTR Format=Alpha-numeric Size=1	If the first occurrence of Driver License Permit Endorsement Group Code (DDLEP1) includes 'P' or 'S', at least one occurrence of the Driver License 1st Permit Restrict Code (DDLRP1) must be 'P'.	H2

CDN1. H2. XCHK. 1300	Driver License Permit Endorsement Group Code (DDLEP1),  Driver License Permit Classification Code (DDLPC2),  Driver License 1st Permit Restrict Code (DDLRP1)	CLMF-DESC-PERM-ENDORSE Format=Alpha-numeric Size=5  aa:Permit/CLMF-DESC-PERM- CLASS Format=Alpha-numeric Size=6  CLMF-CODE-P1-RESTR Format=Alpha-numeric Size=1	If the first occurrence of Driver License Permit Endorsement Group Code (DDLEP1) includes 'P' and the first occurrence of Driver License Permit Classification Code (DDLPC2) includes 'C', at least one occurrence of Driver License 1st Permit Restrict Code (DDLRP1) must be 'N'. **From:** Gary Tancik <Gtancik@resdat.com>  
**Sent:** Wednesday, July 26, 2017 9:32 AM  
**To:** Syeda, Asma  
**Cc:** Peters, Mina L (DOA); Singaraju, Sruti  
**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver L

Upon adding the additional permit endorsements and restrictions, the system prevents adding the N restriction for a class C. The validation only allows N restriction on class A or B. This is contrary to the specifications reference you have provided so this is likely a bug in our system, which I will need to confirm. To your knowledge, would restriction N only be allowed for a class C?

---

This email comes from an external source, so remember, Think Before You Click!  
Gary,

Driver L is added with Permit Endorsement as 'S' and Driver License Permit Classification Code as 'CLASS C' .

'S' Endorsement require 'P' Endorsement on the HC message.

'S' or 'P' Endorsement requires 'P' Restriction on the H6 Message

'S' or 'P' Endorsement with DL Permit Class Code 'C' requires 'N' Restriction on the H6 Message

On the mainframe I was not allowed to enter restriction N to the class C permit upon creation. However, I was able to subsequently update the driver and add restriction N to the permit.

This is probably another topic to discuss with Mina to help determine the intent. There is also a possibility I've created the driver incorrectly. Sorry I could not be more definite.

On the mainframe I was not allowed to enter restriction N to the class C permit upon creation. However, I was able to subsequently update the driver and add restriction N to the permit.

This is probably another topic to discuss with Mina to help determine the intent. There is also a possibility I've created the driver incorrectly. Sorry I could not be more definite.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver L

Upon adding the additional permit endorsements and restrictions, the system prevents adding the N restriction for a class C. The validation only allows N restriction on class A or B. This is contrary to the specifications reference you have provided so this is likely a bug in our system, which I will need to confirm. To your knowledge, would restriction N only be allowed for a class C?

**Attachments:** 2017 AIC Travel Assistance Expense Report-Rev1.pdf; AIC 2017 Travel Assistance - Letter to Contributing Agencies.pdf; Charity Auction Donation Form AIC San Francisco.docx

Good afternoon,

I am forwarding the email from Anne Ferro to ensure everyone has seen the communication about the increase in travel assistance funding to AIC. Additionally, I wanted to remind you there will be a charity auction with proceeds going to the California Association of Highway Patrol Widows and Orphans' Trust Fund. I have attached the donation form to this email. I am looking forward to seeing everyone in San Francisco!

Dear Chief Administrators,

In April, I informed you in the attached memo of the continued Annual International Conference (AIC) travel assistance program that provides member jurisdictions in good standing up to \$4,500 USD for use to attend the 2017 AIC in San Francisco, CA. I am pleased to now let you know that this amount has been increased to \$6,000 in recognition of the expense level needed for this year's conference. We know that some members have had challenges reserving rooms at the conference rate which will require paying a higher room rate. Hopefully, the additional funding will support members' paying these increased costs.

The AAMVA team continues discussions with hotel management in hopes of making more rooms available at the conference rate. If this occurs, we will provide a further update. In the meantime, please [register for the AIC](#) and make your travel and hotel plans accordingly, knowing you may allocate the \$6,000 across airline, hotel, conference registration, and/or per diem costs for as many people as it will cover.

If you have any other questions about the conference or our travel assistance program, please feel free to contact [Ian Grossman](#) or [Dianne Graham](#). Thank you.

Sincerely,

Anne

## MEMO

TO: AAMVA Chief Administrators of Dues-Paying Agencies

FROM: Anne Ferro, AAMVA President & CEO

DATE: Wednesday, April 19, 2017

RE: Travel Assistance for 2017 Annual International Conference

I am pleased to report that, for the ninth year, the AAMVA International Board of Directors will make support funding available for member jurisdictions in good standing to attend the AAMVA Annual International Conference (AIC). A "member in good standing" is defined as a jurisdiction that is current on its membership dues and fees.

AAMVA will provide up to \$4,500 USD to each jurisdiction for use by the dues-paying agency to attend the 2017 AIC in San Francisco, CA. If your jurisdiction's dues are divided between two agencies, the funding will be divided equally between the agencies; if three agencies share the dues, then 1/3 will be allocated to each agency. You are receiving this information because you are Chief Administrator of a dues-paying agency.

To maximize flexibility, you may allocate the \$4,500 across airline, hotel, conference registration, and/or per diem costs for as many people as the \$4,500 will cover. All attendees will register for the meeting via the AAMVA website and pay the jurisdiction rate. You will book your own hotel reservations and pay for the incidentals needed to attend. After the meeting, each jurisdiction will provide AAMVA travel expense forms for each employee or each agency for reimbursement.

In addition, the Board approved funding to support AIC attendance by the chief highway safety law enforcement executive of your jurisdiction (or their executive level designee) in the case where that agency is not in any way responsible for AAMVA dues. If this is the case in your jurisdiction, I plan to send a letter the week of April 24<sup>th</sup> inviting them to use this law enforcement funding. If you would prefer to extend this invitation directly to your law enforcement partner, please [email](#) or call me before April 21st.

If you have any other questions about the conference or our travel assistance program, please feel free to contact [Ian Grossman](#) or [Dianne Graham](#) on the AAMVA team. Thank you.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver L

On the mainframe I was not allowed to enter restriction N to the class C permit upon creation. However, I was able to subsequently update the driver and add restriction N to the permit.

This is probably another topic to discuss with Mina to help determine the intent. There is also a possibility I've created the driver incorrectly. Sorry I could not be more definite.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver L

Upon adding the additional permit endorsements and restrictions, the system prevents adding the N restriction for a class C. The validation only allows N restriction on class A or B. This is contrary to the specifications reference you have

provided so this is likely a bug in our system, which I will need to confirm. To your knowledge, would restriction N only be allowed for a class C?

On the mainframe I was not allowed to enter restriction N to the class C permit upon creation. However, I was able to subsequently update the driver and add restriction N to the permit.

This is probably another topic to discuss with Mina to help determine the intent. There is also a possibility I've created the driver incorrectly. Sorry I could not be more definite.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver L

Upon adding the additional permit endorsements and restrictions, the system prevents adding the N restriction for a class C. The validation only allows N restriction on class A or B. This is contrary to the specifications reference you have provided so this is likely a bug in our system, which I will need to confirm. To your knowledge, would restriction N only be allowed for a class C?

Yes, that will be a problem until we can resolve this issue internally. Hopefully I can make progress on the analysis today.

I am going to need to end testing today to address other issues. Can we pick this up again tomorrow?

I will fix the Driver K UD failure. And I will wait until I hear from you before making any changes to UC per the Driver I DDVSS6 issue.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver L

On the mainframe I was not allowed to enter restriction N to the class C permit upon creation. However, I was able to subsequently update the driver and add restriction N to the permit.

This is probably another topic to discuss with Mina to help determine the intent. There is also a possibility I've created the driver incorrectly. Sorry I could not be more definite.

**To:** 'Syeda, Asma' <[ASyeda@aamva.org](mailto:ASyeda@aamva.org)>

**Cc:** Mina Peters, AK Dept. of Administration <[mina.peters@alaska.gov](mailto:mina.peters@alaska.gov)>; Singaraju, Sruti <[ssingaraju@aamva.org](mailto:ssingaraju@aamva.org)>

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver L

Upon adding the additional permit endorsements and restrictions, the system prevents adding the N restriction for a class C. The validation only allows N restriction on class A or B. This is contrary to the specifications reference you have provided so this is likely a bug in our system, which I will need to confirm. To your knowledge, would restriction N only be allowed for a class C?

Gary,

Sure, you can talk with Mina on this.

Can I re-try # L1?

Thanks,  
Asma

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver L

On the mainframe I was not allowed to enter restriction N to the class C permit upon creation. However, I was able to subsequently update the driver and add restriction N to the permit.

This is probably another topic to discuss with Mina to help determine the intent. There is also a possibility I've created the driver incorrectly. Sorry I could not be more definite.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver L

Upon adding the additional permit endorsements and restrictions, the system prevents adding the N restriction for a class C. The validation only allows N restriction on class A or B. This is contrary to the specifications reference you have

provided so this is likely a bug in our system, which I will need to confirm. To your knowledge, would restriction N only be allowed for a class C?

**Subject:** RE: AK - AMIE Online Re-write Meeting

I am so sorry, I got pulled for a production issue and I didn't realize the time as I wasn't at my computer for the reminder.

Again, I apologize!

Thanks,  
Susan Creighton / 703.908.5893 office

I'm not sure. If it helps matters, we're still not currently testing. Nearly all of the anticipated changes have been made or are being finalized. Our plan is to be at least regression testing if not actually testing by Monday morning.

That's all I have and I don't have any additional questions.

Dear Fraud Exemplar Contacts~

You are receiving this email because your jurisdiction designated you as the Contact for Training Exemplars. If you are no longer the person of contact, please notify me immediately.

AAMVA knows how important it is for each jurisdiction to have sample documents to use with their training programs and has been working with the federal agencies to obtain sample documents suitable for training. I am happy to announce the United States Department of State /Bureau of Consular Affairs/Office of Fraud Preventions has provided AAMVA with **US Permanent Resident (LPR) and US Employment Authorization (EAD) cards**. We can provide two of each document per jurisdiction.

We also have a few extra **"Service Passports"** available if your jurisdiction is interested in obtaining them, please indicate it on the contact sheet.

Due to security reasons, we must request that each jurisdiction identify a primary and secondary contact in their jurisdiction to monitor and track the exemplars in order for us to disseminate these materials. By filling out and faxing in the form below, the individuals identified are accepting responsibility for the exemplars the jurisdictions receive. If they are stolen or misplaced they will need to notify AAMVA immediately.

If your jurisdiction is interested in obtaining training samples, please fill out the attached form and email it back to me.

Your assistance is appreciated. If you have any questions or concerns, please feel free to contact me at 703.908.5767 or [dhanchulak@aamva.org](mailto:dhanchulak@aamva.org)

Yes, that will be a problem until we can resolve this issue internally. Hopefully I can make progress on the analysis today.

I am going to need to end testing today to address other issues. Can we pick this up again tomorrow?

I will fix the Driver K UD failure. And I will wait until I hear from you before making any changes to UC per the Driver I DDVSS6 issue.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver L

On the mainframe I was not allowed to enter restriction N to the class C permit upon creation. However, I was able to subsequently update the driver and add restriction N to the permit.

This is probably another topic to discuss with Mina to help determine the intent. There is also a possibility I've created the driver incorrectly. Sorry I could not be more definite.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver L

Upon adding the additional permit endorsements and restrictions, the system prevents adding the N restriction for a class C. The validation only allows N restriction on class A or B. This is contrary to the specifications reference you have provided so this is likely a bug in our system, which I will need to confirm. To your knowledge, would restriction N only be allowed for a class C?

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver L

This email comes from an external source, so remember, Think Before You Click!  
Gary,

Driver L is added with Permit Endorsement as 'S' and Driver License Permit Classification Code as 'CLASS C' .

'S' Endorsement require 'P' Endorsement on the HC message.

'S' or 'P' Endorsement requires 'P' Restriction on the H6 Message

'S' or 'P' Endorsement with DL Permit Class Code 'C' requires 'N' Restriction on the H6 Message

CDN1. H2. Yes, that will be a problem until we can resolve this issue internally. Hopefully I can make progress on the analysis today.

I am going to need to end testing today to address other issues. Can we pick this up again tomorrow?

I will fix the Driver K UD failure. And I will wait until I hear from you before making any changes to UC per the Driver I DDVSS6 issue.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver L

On the mainframe I was not allowed to enter restriction N to the class C permit upon creation. However, I was able to subsequently update the driver and add restriction N to the permit.

This is probably another topic to discuss with Mina to help determine the intent. There is also a possibility I've created the driver incorrectly. Sorry I could not be more definite.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver L

Upon adding the additional permit endorsements and restrictions, the system prevents adding the N restriction for a class C. The validation only allows N restriction on class A or B. This is contrary to the specifications reference you have provided so this is likely a bug in our system, which I will need to confirm. To your knowledge, would restriction N only be allowed for a class C?

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver L

Yes, that will be a problem until we can resolve this issue internally. Hopefully I can make progress on the analysis today.

I am going to need to end testing today to address other issues. Can we pick this up again tomorrow?

I will fix the Driver K UD failure. And I will wait until I hear from you before making any changes to UC per the Driver I DDVSS6 issue.

**Cc:** Peters, Mina L (DOA); Singaraju, Sruti  
**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver L

Thanks. This fix will need to go into the next deployment.

I've deployed fixes the UD for Driver K test K5 and also the added the capability to create a pointer for doc type 8 that allows for real ID values other than 2. This was for driver J.

The C permit N restriction will need to wait on Mina's return so Driver L will need to be skipped.

So at this time driver D, I and L are on hold but we can continue with Driver K, test K5 then go back to Driver J as necessary.

Let me know if you are ready for K5.

Gary,

For the UC issue you had yesterday for Driver I ( Test Case # I4) , since the Driver is a non-cdl Pointer, Full SSN ( old and new) should not be sent:

Can you please try sending the UC again with just the Old Last 5 SSN and Last 5 SSN.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver K

Apparently I introduced a bug whereby no change in SSN on the UD caused a substitute SSN to be sent instead. Hence, the UD was returned in error. This will require a fix.

Would you like to jump back to Driver I? I deployed a fix for the NI so I should be able to retry test I3.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver K

Apparently I introduced a bug whereby no change in SSN on the UD caused a substitute SSN to be sent instead. Hence, the UD was returned in error. This will require a fix.

Would you like to jump back to Driver I? I deployed a fix for the NI so I should be able to retry test I3.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver K

Apparently I introduced a bug whereby no change in SSN on the UD caused a substitute SSN to be sent instead. Hence, the UD was returned in error. This will require a fix.

Would you like to jump back to Driver I? I deployed a fix for the NI so I should be able to retry test I3.

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver K

Apparently I introduced a bug whereby no change in SSN on the UD caused a substitute SSN to be sent instead. Hence, the UD was returned in error. This will require a fix.

Would you like to jump back to Driver I? I deployed a fix for the NI so I should be able to retry test I3.

Good Morning Mina,

I wanted to check with you about the PRC and the CDLIS WG Meeting Invite. You did mention during our last PRC call that you did not have these meetings on your calendar. I do see you part of both of these meeting series.

If you still don't see these on your calendar, I could send the invite to you again. Please do let me know.

Thanks,

Madhu

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver K

Apparently I introduced a bug whereby no change in SSN on the UD caused a substitute SSN to be sent instead. Hence, the UD was returned in error. This will require a fix.

Would you like to jump back to Driver I? I deployed a fix for the NI so I should be able to retry test I3.

This email comes from an external source, so remember, Think Before You Click!

Gary,

When the IN message was sent initially, it was sent with Last Name as 'AIAAIS2SEXCHGDRIVERK'.

Driver K's last name is 'AIS2SEXCHGDRIVERK'.

Thanks,  
Asma

Gary,

Driver K added, please proceed with # K1.

Thanks,

**Asma Syeda**, CSM

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver K

The CSOR completed although there were errors encountered with the H7 linkages. A UD message was sent back with the errors, which I gather is incorrect. Let me know your expectations on how this should have been handled.

Gary,

The Old Real ID was sent as '1', can you please change it to '2' ( since Driver K was added the value as '2' for Real ID Conformant)

I received the return error THE MSTR PTR REC RQSTD NOT ON FILE, although the pointer parameters appear to match the values depicted in test K5 for the P3 driver. Can you help find the problem?

**Subject:** RE: AI - SPEXS 6.0 Baseline Structured test plan - FP-Driver K

Apparently I introduced a bug whereby no change in SSN on the UD caused a substitute SSN to be sent instead. Hence, the UD was returned in error. This will require a fix.

Would you like to jump back to Driver I? I deployed a fix for the NI so I should be able to retry test I3.
